# REPORT TO THE JUDICIAL COUNCIL

For business meeting on December 12-13, 2013

---

Title  
AOC Restructuring: Implementation of New  
Guidelines for Conducting Cost-Benefit  
Analysis for AOC Projects

Agenda Item Type  
Information Only

Effective Date  
Not Applicable

Rules, Forms, Standards, or Statutes Affected  
None

Date of Report  
December 13, 2013

Director, Fiscal Services Office

---

### **Executive Summary**

The AOC's Chief Administrative Officer and director of the Fiscal Services Offices present this informational report on efforts relating to the various common aspects of Judicial Council Directives 7-13, 21, 40, 91, and 145 (directives), which were combined as part of a broader review and policy discussion pertaining to the application of a cost-benefit/business case analysis for AOC projects.

### **Background**

The Judicial Council approved the directives as recommended by the Strategic Evaluation Committee (SEC) pertaining to the way in which the Administrative Office of the Courts (AOC) undertakes significant projects and branchwide initiatives. In their report, the SEC observed the following:

“The AOC has failed to plan, manage, and monitor programs in a manner that seeks critical collaboration and input from the courts. The AOC has undertaken significant and

far-reaching programs over the past decade, including CCMS, branch-wide financial systems, court construction and facilities management, and others. The organization has failed to adequately consider fiscal, operational, and other impacts of its programs and projects on the courts. Projects have been undertaken without first conducting an appropriate business case analysis to determine whether they are prudent.”

As noted, the SEC opined that there appeared to be a lack of uniform internal processes, insufficient collaboration, and inadequate analysis associated with large scale endeavors. More specifically, nearly all of the aforementioned directives relate to observations made by the SEC relative to the California Court Case Management System initiative:

“The AOC’s process of planning and monitoring programs and projects has been lacking. These deficiencies are best exemplified by the CCMS project with its lack of budgetary planning, failure of budgetary controls, failure to identify a sustaining revenue source, lack of an initial business case analysis and feasibility study, lack of sufficient court commitment, and failure to openly disclose pertinent information about the project.”

To address these deficiencies, the SEC detailed a recommended approach:

“... The AOC Executive Leadership Team must begin to implement a formalized system of program and project planning and monitoring that includes, at a minimum: a collaborative planning process that utilizes a business case analysis and that includes an analysis of impacts on courts at the outset of all projects; use of workload analyses where appropriate; and development of general performance metrics for key AOC programs that allow expected performance levels to be set and evaluated.”

In developing a response to the directives, AOC staff consulted with other state entities—such as the Department of Finance and CalHR—on their respective processes in an effort to establish a similar approach at the AOC that incorporates an appropriate level of review and cost-benefit analysis for programs and projects initiated by the agency. As one example, staff utilized the state Department of Finance’s [Budget Analyst Guide](#) as an initial framework. Specific guide sections, such as [Types of Analysis](#) (Attachment A) and [Analysis of Issues](#) (Attachment B), were also identified as potential training tools for AOC staff to demonstrate the basic elements of how appropriate fiscal and programmatic analyses are completed. Since the material is general in nature, each office and division would, in theory, be able to use these resources to meet the individual needs of the program, whether it be completing a grant request for federal funds or a budget change proposal, to name a few.

Following the review of external and existing internal processes, AOC staff developed guidelines that seek to ensure that all elements within each of these 10 directives are adequately addressed. These guidelines include a process for the approval of branchwide projects and other significant initiatives, as well as an approach to conduct any necessary cost-benefit analysis. These elements include:

- The input and collaboration of all stakeholders;
- A complete analysis of scope;

- The development of accurate cost estimates and the identification of funding in constant collaboration with the Fiscal Services Office;
- The application of cost and contract controls including monitoring;
- Full documentation of the decision-making processes; and
- Full transparent consideration of fiscal, operational, and other impacts to the courts and stakeholders.

The "Guidelines for the Administration of Branchwide Projects and Initiatives" (Attachment C) have been reviewed and approved by the Administrative Director of the Courts and will be implemented agency-wide, effective the first quarter of 2014. Leading up to the implementation date, the Fiscal Services Office will work with staff from the AOC Center for Judiciary Education and Research to develop an appropriate training curriculum for management team members, budget liaisons, and other applicable staff.

These guidelines address the SEC's recommendation that a cost-benefit analysis should be infused into the AOC's decision-making process and to serve as a guide when considering any new project or program, large scale or otherwise.

### **Enclosures**

Attachment A: Department of Finance Budget Analyst Guide, *Types of Analysis*

Attachment B: Department of Finance Budget Analyst Guide, *Analysis of Issues*

Attachment C: *Guidelines for the Administration of Branchwide Projects and Initiatives*

## TYPES OF ANALYSIS

### BCPs or other issues involving a proposed augmentation

1. Have the department or group proposing the augmentation clarify what the problem is. All too frequently problem statements are either missing, too brief or too general to be sufficiently clear and quantifiable, discuss symptoms rather than real problems, or are stated in terms of the solution (e.g., "the problem is we don't have the 14 additional staff we need"). The analyst's role is to find out if there is a **public** need which is not being addressed, i.e., what is the problem outside of building? Things like crime, pollution, and poverty are possibilities; the lack of staff, microcomputers, and travel funds are not. Moreover, the problem should be quantified as much as possible so that a quantifiable solution can be arrived at. This should address:
  - a. the extent of the problem
  - b. how this varies from a "normal" or acceptable situation
  - c. how many individuals are experiencing the problem
  - d. where this problem is located geographically
  - e. need statements should answer the question "why?"
2. **Consider Alternatives for Solving the Problem.** Most BCPs provide two: (1) do nothing and (2) accept our proposal. Do not be deterred by the apparent lack of creativity on the part of some. There is more than one way to solve a problem, especially in an era of constantly changing technology. You might consider:
  - a. automation
  - b. program restructuring
  - c. restructuring systems and procedures
  - d. consolidation of functions
3. **The Key Element in a BCP (or other Proposal) is Data** to justify the resource level being proposed. Most proposals request specific amounts of staff and funds. These requests should be supported by equally specific calculations. To the extent that specificity is lacking, the analyst may be required to fill in the gaps in order to develop a recommendation. Usually, this kind of analysis starts with a zero-augmentation assumption and builds in components as they are specifically justified on an individual basis.

**Attachment A**

For example, a particular solution may involve several different types of staff in field offices, headquarters management, and in the Administration Division, each developed on a different basis. In summary, in this type of situation we start with zero and add in resources as they are justified by specific calculations. As a general rule, if you cannot understand where the number comes from, do not add it in.

4. If they lowballed the bill analysis, they should live with it in the BCP.

**Workload Issues**

In past years, departments were usually funded for agreed to workload increases. More often than not, in recent years with severe budget restraints and no or insufficient funds available to meet mandatory requirements, workload often is not funded. Departments are required to redirect resources or find other alternatives. Despite that, workload analysis is an important Finance activity.

1. The key variables in workload issues are:
  - a. the volume of work to be accomplished, generally referred to as workload
  - b. the current staffing level
  - c. the workload completed with current staff
2. The ratio of workload being currently completed to current staff will usually provide a good estimate of the productivity rate. The ratio of the workload to be accomplished to the productivity rate is the number of staff required to complete that workload. Example—CAL/OSHA elevator inspectors will inspect about 27,500 elevators this year for safety requirements. Next year the number will increase to 28,500. Currently there are 40 inspectors. How many are needed for next year?

Answer	<u>27,500</u>	=	687.5	(Number of elevators
			40	(1 inspector can inspect)

**Attachment A**

$$\frac{28,500}{687.5} = 41.5 \quad \begin{array}{l} \text{(Number of} \\ \text{inspectors)} \\ \text{(needed )} \end{array}$$

Therefore, 1.5 additional inspectors would be justified on a workload basis. Further, there is one clerical staff for every 4 inspectors in the program, so the addition of 1.5 inspectors would justify  $1.5 \times .25$  or 0.4 of a clerical position, for a total of 1.9 PYs.

3. Sometimes it is necessary to pursue additional justification for the volume of workload projected, depending on historical patterns. Also there may be ways to increase current productivity rates without adding staff by changing procedures or by automating certain functions. The workload calculations should be performed only after the analyst is satisfied with the data that goes into those calculations.
4. **Never** accept a duty statement as workload justification. Anyone can fill up 40 hours per week with activities. This has no relationship to the external workload, how it is changing, and what staffing implications it has.
5. Workload may fluctuate throughout the year. Our policy is usually not to staff a unit for peak workload demands (with the possible exception of temporary help funds where warranted, such as the Franchise Tax Board), but rather to support staffing to process the average workload level.
6. Workload standards are useful if they have been validated and we have agreed to them. Departments should be encouraged to develop them. Even if this hasn't been done prior to writing the BCP, it may be possible to use time sheet and other activity data to put together some useful standards. But be careful, before proceeding, apply the workload standards to last year's work. Does the analysis show it would require 20 PYs to do the work that you know they did with 10 PYs?
7. Be careful of backlog statistics. There is a difference between backlog and a working inventory. A backlog measurement should exclude:
  - a. workload which is currently being processed

**Attachment A**

- b. workload which can be processed in a reasonable or statutorily required length of time
- c. workload which has been set aside because it is incomplete, waiting for additional information, or otherwise cannot be processed.

**National Association of State Budget Officers (NASBO)**

(March 3, 2011) (Analytic/BOS/PBM/APBM)

## ANALYSIS: Principles and Practices for DOF Analysts

### A. What is Analysis?

Analysis is the process by which issues are separated into their component parts and each part and the interaction among the parts are systematically investigated. Later the components of an issue are put back together in a logical way to support a conclusion and recommendation.

You can also think of analysis as the process by which we attempt to answer such questions as follows, regarding a proposal, activity, program or process.

- Who or what is affected?
- What is/are the effects?
- How and when does/will it operate?
- How much does/will it cost?
- Who is raising the issue or making the proposal, and why?
- How might the problem/issue be resolved?

And the final question upon completing an analysis should always be: "Does this make sense?"

### B. Typical Types of Finance Analyses

Finance uses the analytic process to develop recommendations on budget proposals, legislation, and other initiatives and issues that may financially impact the State. Preparing solid recommendations is the foundation for our advisory role to the Governor's Office and our role in representing the Administration.

1. **Fiscal** - Finance's primary role is to provide analyses of fiscal issues or problems. To that end, we review budget change proposals, legislation, initiatives, regulations, and reports to analyze fiscal impacts. Fiscal analyses answer such questions as: How much will (or should) this proposal or program cost (or save) the State? How much revenue will it generate?
2. **Policy** – While not our main role, Finance staff may also perform policy analysis such as when reviewing legislative proposals. Policy analysis is intended to help decision-makers make choices about governmental programs and governmental regulation of individuals and organizations. Policy analysis focuses on such questions as: What is the likely impact of this policy on the public in general, and on specific groups or organizations? Policy analysis can be done from the perspective of known priorities and policies, or without such political preconditions.
3. **Policy combined with fiscal**—Most often Finance's analyses include a combination of fiscal and policy issues. For example, Finance analysts review a Budget Change Proposal to assess the reasonableness of the estimated fiscal impacts but also assess the proposed policy objective in relation to the Administration's priorities. The resulting recommendation thus may indicate that the proposed funding augmentation (or reduction) should be modified

**Attachment B**

depending on whether the policy objective is deemed to be of high or low priority by the Administration. The recommendation may also suggest an option that provides a lower (or higher) level of attainment of the policy objective, including arguments supporting that level.

Sometimes the deadline for an analysis is so short that the analysis must be “**quick and dirty**” and largely based on assumptions since time is not available to gather more information. In these cases it is helpful if the assumptions can be based on historical information or on data from a similar program or activities. In other cases (such as when asked to prepare “Issue Memos”), Finance may have time to prepare a more expansive analysis.

For more details on some of the specific types of items analyzed at Finance, see [Bill Analysis](#), and [BCPs, Writing Effective](#).

**C. Steps in Analysis**

Academics identify various analytical approaches, which can generally be summarized into six basic steps. (See [Analysis, Policy, and Problem Solving](#) for a detailed summary of various analytical approaches.)

**1. Define the Problem**

- Clearly identify the stated issue/problem. Is there really a problem? Sift through extraneous material to identify the real, underlying problem or need (which may not be the same as the stated issue or problem).
- How big is the problem? Quantify, if possible.
- How did the problem arise? When? What perpetuates it? Outline the history of the issue/problem.
- Who and/or what does the problem impact? When? What are the current laws, regulations and/or programs addressing the problem?

**2. Gather Information**

- Consider: What do you need to know to define and analyze the issue/problem, and to recommend a solution? How much time do you have?
- Ask questions (repeatedly if necessary) to get the information needed. Also be conscious of and respect others' time and workload constraints, however.
- Be skeptical. Challenge the sources; don't assume the information is correct. Try to verify it or test it against other information to determine its accuracy or reasonableness.
- Think through varied viewpoints on the issue (not just the Administration's current perspective). Talk to both proponents and opponents to gain additional political and programmatic insights.
- Ask follow up questions.
- If you cannot get the information you want in the time (or from the sources) available, can you make assumptions to work around it or develop rough estimates? Document the basis for your assumptions.
- Look at other previous analyses/studies of the issue.
- Note that if the time is late (after 5 p.m.) or short (“quick and dirty” analyses) you still may be able to contact the Legislative Analysts' staff, legislative committee staff, (or for bills, the author's or sponsor's office, too) for some information, even if the department staff are not available.

**3. Consider Alternatives**

- What are all the feasible options? Consider for example, taking no action; altering an

**Attachment B**

existing law, regulation, process, or program; creating a new law or program, etc.

- What can government do (e.g., mandate, regulate, subsidize, create incentives, tax, provide information, privatize), and what might be effective in this situation?
- What other programs (public or private) or laws (state or federal) address this problem?
- What have other states done to address this problem?
- What has Finance recommended on this type of issue in the past?
- Should the State be involved at all?

#### **4. Determine Criteria for Evaluating Alternatives**

Examples of criteria:

- Efficiency - Cost-benefit, cost effectiveness, productivity
- Equity - Is it fair? Who gains, who loses? By how much?
- Effectiveness - Will it solve the problem? How much will it solve?
- Feasibility - Legal, administrative, political (e.g., the current political environment)
- Uncertainty and risk - What could go wrong? How costly? How likely?
- Priority for funding given current state fiscal constraints and Administration policies
- Consistency with Administration goals and policies and expectations

#### **5. Evaluate Alternatives**

- Measure each alternative against the criteria.
- Weigh the trade-offs (e.g., better service vs. higher cost; lower cost vs. higher risk)

#### **6. Make Recommendation**

- Pull the information together to form conclusions, and then make recommendations.
- Be creative. Policy analysis affords opportunities to develop creative compromises and unique solutions to address problems. Although Finance is not a "think tank," we can occasionally be the source of new policy ideas.
- Anticipate the Administration. Try to recommend at least one option likely to be preferred by the Administration (based on what you know of the current policies and priorities).
- Recommend more than one feasible alternative for the decision-makers to consider (e.g., in times of limited funds recommend the preferred activity and funding level, and some feasible lower level).
- Review your analysis and ask if it all "makes sense." Can a reader follow the logic from the problem identification through the alternatives to the recommendation?
- Check to see how critical any information (both included and omitted) is to the recommendation.
- Critique and supplement (or pare down) the information as needed.

### **D. Communicating Your Analysis**

To be effective, an analysis must be clearly communicated to the decision-makers and other interested parties.

#### **1. Types of Presentations**

- Oral presentations in meetings
- Budget change proposal (BCP) write-ups
- Bill analyses
- Legislative testimony

**Attachment B**

- Press packets or contacts
- Governor's Budget Summary ("A-pages") and other public reports
- Issue Memos
- One-on-one discussion/negotiation with LAO and departmental staff

**2. Presentation Style**

- Narrow focus. Finance does not typically produce lengthy study reports that thoroughly analyze all aspects of major policy issues. Finance's analyses tend to focus in on the fiscal impacts to state government and, in particular, to the General Fund.
- Related to specific decisions. Our analyses tend to focus on information needed to make a specific decision, and normally will recommend a specific action on an issue.
- Brief and clear. Finance does not get much time to speak its piece; often one or two lead sentences have to carry the presentation.
- Unbiased/nonpartisan, but politically informed. Although we work for the Governor and do analysis in the context of known Administration policy and perspective, Finance staff should be prepared to argue all sides of an issue (e.g., in Administration decision-making meetings). Recommendations on issues should reflect a balance between what might be acceptable to the Administration, and other considerations, including other viewpoints relevant to a decision. (Finance staff should not expect to promote personal political views, however.)
- Original and active. Use active (not passive) voice as much as possible, and state your thoughts without plagiarizing others' analyses (e.g., departments' analyses or documents).
- Professional. Both oral and written presentations should be made keeping in mind our professional staff role.

**3. Traditional Biases of Finance**

- Low cost/high benefit
- Proven effectiveness
- High priority
- Fundable by redirection of existing resources
- Consistent with Administration goals

**4. Other Considerations**

- Preparation. Finance staff are some of the main spokespersons for the Administration, and as such are expected to be able to explain and defend the Administration's position (e.g., on budget proposals) before the Legislature and in answering press calls. Be sure your analysis is adequate to support and defend the recommendations.
- Audience. Be aware of who reads and/or needs the information, and focus the presentation to address their level(s) of knowledge. Give adequate information to understand the issue and recommendation.
- Timing. Be sensitive to whether a decision maker can be receptive to a proposed policy and whether the issue's time has come. Often we are not the best organization to raise an issue; it may be better raised by agency/department staff or others with policy-making

**Attachment B**

authority.

- Respect for hierarchies. Finance staff should understand and respect the hierarchy of Finance and of other departments and agencies we work with. It is important to differentiate the positions that may be taken by various levels in a department and the degree to which top management has (or has not) approved a particular position.
- Flexibility. The Administration may decide on a different option that you recommend. Be ready and willing to revise your analysis to further detail the selected option, and/or reframe the issue, if necessary.
- Disassociation. Although it can be hard to do, Finance staff should not let themselves get too personally committed to policy recommendations they make or view nonacceptance as a "personal defeat."

**E. Developing Policy Analysis Skills/Knowledge**

The foundation for any analysis is a thorough working knowledge of your program/subject areas; the issues; and State processes, priorities, and fiscal constraints. The following are some tips on the sources and types of information you should gather (an ongoing process), and how to manage your time to complete analyses.

**1. Sources of Information.**

Following are some suggested sources and methods for developing your policy understanding and analytical skills. You will be engaged in many of these activities in the course of your work, but take advantage of slow moments for further research and discussion of policy issues in your area.

- Read texts, articles, books, and analyses done by others (e.g., scholars, advocates, the Legislative Analyst, Bureau of State Audits)
- Learn the history (e.g., talk to or review written work of your predecessors on the assignment)
- Listen to others who already know the programs and issues well (e.g., talk with department staff when reviewing various documents)
- Discuss issues with advocates and constituents
- Take field trips to visit program staff and projects in the field
- Learn by doing (jump into your assignment!)

**2. Areas of Knowledge**

- a. **Program Knowledge.** The foundation for any analysis is a thorough working knowledge of the program being addressed. No analytical technique can replace basic information about how the program works. Such knowledge typically includes: the program's purpose, who and how many it serves, what it provides, how services are delivered, the current costs, criteria for expending the funds, how the program evolved (e.g., what were key decision points in program's history), and the trends in terms of revenues, expenditures, staffing, and workload data.
- b. **Knowledge of the State's current fiscal situation and constitutional**

**Attachment B**

**constraints.** Less than ten percent of the budget is discretionary. Some of the key factors limiting State expenditures are: the State Appropriations Limit (SAL), Proposition 98, other Constitutional requirements, entitlement programs, statutory COLAs, and legal obligations. Other constraints not set in the Constitution or statute but which are as, or nearly as, restraining, include: General Fund revenues, General Fund reserves, federal budget actions directly affecting the State's budget, tax expenditures, public safety expenditures, revenue-producing activities, and budget agreements.

In analyzing budget issues, it is important to keep these factors in mind and know where we are relative to the major constraints. This will tell you whether we have some flexibility and can entertain discretionary proposals, or whether we're going to have to recommend reductions.

- c. **Knowledge of other Administration and Department of Finance Priorities.** Current State policies and priorities (such as those outlined in the *Governor's Budget Summary* or *Budget Highlights*, or the *State of the State Address*) need to be taken into account when analyzing an issue. Examples of recent State priorities include: (1) reducing personnel years (PYs); (2) reducing General Fund expenditures; (3) attempting to help the federal government reduce the federal deficit; (4) reforming welfare; and (5) making the State more competitive. Awareness of these policies helps analysts to frame questions and recommendations.
- d. **Knowledge of the Issue.** Besides general program knowledge, specific information about the issue being addressed is important to understanding proposed changes. For example, analysts may prepare by researching the history of issues in their program area, why the issues are (re)emerging, views of proponents and opponents, and what this and other states are doing to address the issues.

### 3. Managing Your Analytical Time and Effort

- Get started early. Size things up. Decide when you need to start each task in order to meet your deadline. Set a mental schedule (allowing for slippage).

Tell the department what information you need right away. Put requests in writing (e.g., by email) when possible to confirm conversations and avoid misunderstandings later. Set a deadline for receipt of this information which is early enough so that you can ask for clarification, or request other information if this raises additional questions.

- Follow up. Think about the information as it's being presented to you. Is it filling in the gaps? What gaps remain? Take the initiative to ask follow-up questions and probe when talking to department staff. It is relatively rare that your first set of questions will elicit all of the information necessary for an analysis. Keep thinking of what you need to resolve the issue.
- Stay on Course. Don't lose sight of your objective and deadline, or get sidetracked. Make sure you understand what's central to the issue, and that you're getting the information you need from department staff (i.e., what's relevant, not what's easy for them to give you). Periodically, review where you are relative to your objectives and schedule. Make mid-course corrections as necessary. Raise problems to a higher level in DOF or the line department, as appropriate.
- Stop when you have what you need or you have all you can get in the time available. In the latter case, qualify your analysis by indicating the conclusions are

**Attachment B**

based on the limited information available and noting any assumptions made.

- Get feedback. Brainstorm ideas with your supervisor and peers. Discuss your findings and conclusions with your managers and with the department. Run drafts of your analysis and recommendations by your managers in advance of the deadline to get their input early.
- Critique your own work. Check and double check your calculations. Review your analysis to see if there are further logical gaps that need to be filled in. See if your factual information is correct, and if your argument holds up to criticism. Revise your analysis if necessary.
- Keep records. Keep your notes, supporting data obtained, and calculations made in a file for reference. (You'd be surprised how quickly people forget how they arrived at certain numbers!)
- Be sensitive to other workload demands on staff with whom you are working. You will likely need their assistance and cooperation in the future. Nevertheless, if they won't give you the information for any of the following reasons:
  - Because they've been appointed by the Governor
  - They told the last analyst they had
  - The last analyst they had didn't ask for this type of information
  - It's not Finance's role
  - They wouldn't ask for funding if they didn't need it
  - They're stalling
  - The Governor wants this done
  - You don't have the professional qualifications
  - The Director already agreed to this

you'll have to recommend disapproval of their request for lack of justification. Tell your supervisor of the situation and discuss how to resolve it.

# GUIDELINES FOR THE ADMINISTRATION OF BRANCHWIDE PROJECTS AND INITIATIVES

---

## **Policy Statement:**

Unless contrary direction is provided by the Judicial Council, the initiation of branchwide projects and other significant initiatives shall be preceded by a full and comprehensive cost-benefit analysis that includes the input and collaboration of all stakeholders, a complete analysis of scope, accurate cost estimates and funding streams and associated controls, documentation of the decision-making processes, and the full transparent consideration of fiscal, operational, and other impacts to the courts and stakeholders.

## **Overview:**

The following guidelines have been established to assist with the preparation of formal project proposals. They seek to implement a comprehensive process of programmatic and fiscal analysis that ensures all costs and benefits are considered before a decision is made regarding whether to proceed with a proposal within the Judicial Branch.

## **Process:**

1. Issue or Concept Identification:
  - Offices/divisions identify issue or concept (e.g., initiating new programs, expanding existing programs, creation of new requirements on branch entities, requesting federal or state grants, etc.)
  - Office Director holds preliminary discussions with Division Chief
  - Division Chief and Office Director present the issue to the Executive Office as an informal concept
  - Executive Office determines depth of analysis required and assigns the issue or concept to the appropriate Office/Division for further evaluation.
  - Executive Office determines if consultation with Judicial Council or the Executive and Planning Committee is necessary based on factors such as funding needs, scope of effort, and policy issues.
  
2. Preparation of *Request for Approval of Project Proposal* (RAPP) Form
  - The RAPP, prepared in accordance with these guidelines, must be approved for every project prior to the encumbrance or expenditure of funds on the project, including use of staff resources on implementing the project.
  - The RAPP establishes the business case for investment of branch resources in the project by setting out the reasons for undertaking the project and analyzing its costs and benefits, absent contrary direction from the Judicial Council.

- The Fiscal Services Office will conduct training for staff involved in the completion of the RAPP form, with an emphasis on the Cost Considerations section, upon request.
  - Participation in the web-based training titled *Analytical Thinking for Analysts* available through the California Department of Human Resources is encouraged: <http://www.calhr.ca.gov/Training/Pages/index-analytical-thinking-for-analysts.aspx>
- Components of the RAPP Form
    - a. Requesting Office or Division
    - b. Date Prepared
    - c. Contact Information
    - d. Project Title
    - e. Summary
    - f. Summarized Estimated Costs
    - g. Proposal Review Routing
    - h. Associated JC Strategic Goal, if applicable
    - i. Project Scope
    - j. Stakeholders
    - k. Impact Analysis
    - l. Documentation of Decision-Making Process
    - m. Cost Considerations
    - n. Authorization to Proceed (Office Director or Designee)
3. The RAPP form should be forwarded to the appropriate Division Chief for review and approval only after all issues raised by internal review have been addressed.
  4. Briefing of Executive Office by Division Chief/Office Director
    - Consider routing to appropriate Judicial Council committee (such as the Executive and Planning Committee) or Judicial Council
    - Consider discussion with Chief Justice
    - Consider discussions with external stakeholders such as the courts or State Bar
  5. Executive Office Action
    - If issue or concept was identified within the AOC, approve, disapprove, or return to applicable office for further examination.
    - If issue or concept was identified by the Judicial Council, respond to the Judicial Council as directed with recommendation or act as directed by the Judicial Council.

## Questions

Questions regarding these guidelines or the RAPP form can be directed to Bob Fleshman at (415) 865-7531 or [bob.fleshman@jud.ca.gov](mailto:bob.fleshman@jud.ca.gov).

# REQUEST FOR APPROVAL OF PROJECT PROPOSAL

Rev. 10/10/13

Requesting Office or Division	
Date Prepared	
Contact Information	
Project Title	
<b>Summary</b> <i>(Please provide 3 to 4 sentences briefly describing your request.)</i>	
<b>Summarized Estimated Costs</b> <i>(Please differentiate between one-time and ongoing costs, if applicable.)</i>	
<b>Proposal Review Routing</b> <i>(Please select as applicable.)</i>	<input type="checkbox"/> Human Resources Office <input type="checkbox"/> Legal Services Office <input type="checkbox"/> Fiscal Services Office <input type="checkbox"/> Information Technology Services Office <input type="checkbox"/> Office of Governmental Affairs <input type="checkbox"/> Other _____ <input type="checkbox"/> Other _____ <input type="checkbox"/> Executive Office
<b>How does this proposal further the goals of the Strategic and Operational Plans for the Judicial Branch?</b>	

**Project Scope**

Please provide your business case analysis of the scope and direction of your project, including timeline.

**Stakeholders**

Please list your project's stakeholders and what input they have provided for your project. Include any steps you took to inform and collaborate with your stakeholders about your project.

**Impact Analysis**

Please describe the anticipated effect on workload and resources on the AOC or stakeholders directly or indirectly if this project is approved. Consider staff time, additional funding, and other requirements involved in successfully administering and implementing this project. Include offsets where applicable.

**Documentation of Decision-Making Process**

Please provide a summary of items you used to determine the need for this undertaking. Provide attachments where applicable.

**Cost Considerations**

Cost estimates must be developed in collaboration with the Fiscal Services Office.

<b>Budget Augmentation Required?</b>										
	No									
	Yes		<b>If YES, indicate fiscal year(s) and associated amount:</b>							
			<b>FY</b>		<b>FY</b>		<b>FY</b>		<b>FY</b>	
			\$		\$		\$		\$	

**PROJECT COSTS**
