

**APPENDIX J**  
**CONFIGURATION REQUIREMENTS**

Priority	Requirement Name	Requirement Text	Response	Comment
High	<i>Configuration</i>	The system must be configured during initial deployment to meet specific business requirements. Describe Proposer's strategy and processes to gather, load and validate localized configuration. <b>Instructions:</b> Explain the roles and responsibilities for those involved in the process.		
High	<i>Configuration</i>	Describe the process and tools used for initial loads and maintaining configurable items (i.e., users, workflow, hourly rates) within the system.		
Medium	<i>Configuration</i>	Specify whether all application configuration is done through screens intended to be used by local courts for ongoing maintenance.		
High	<i>Configuration</i>	Describe the roles and responsibilities involved in configuration maintenance. If configuration maintenance is a proposer responsibility, describe the SLAs in this task.
