I write to support the immediate implementation of the SEC recommendations as set forth in the May 2012 report on the AOC. As a result of the current AOC institution individual courts and judicial officers have suffered and are without an effective voice in decision making and budgetary spending and priorities. The layoffs of so many valuable employees and the closure of necessary courts is directly attributed to the abuse of power and over and wasteful spending of the AOC which has ballooned out of control leaving our courts with insufficient resources to serve the public.
