---

Dear Colleagues:

I was appointed to the Los Angeles Municipal Court during 1987 and the Superior Court in 1995. Thank you in advance for giving serious consideration to my comments.

The purpose for convening the SEC was to review, among other things, the AOC's effectiveness, efficiency, usefulness, structure, and strategies in carrying out its role as service provider to the Courts of California. The necessity to address those issues was spawned, in part, primarily because of the perception that the organization had lost sight of its role as a service provider, its explosive growth, and consequential use of very limited resources which otherwise could have been allocated to the court's core mission, service to the public. After a great deal of thoughtful consideration and deliberation, the committee has made recommendations which appear to be appropriate and necessary and would work to the overall good of the judicial branch. I strongly urge its immediate implementation.
