

CCMS DATA EXCHANGE DATA SHEET

ADMINISTRATIVE OFFICE
OF THE COURTS

INFORMATION SERVICES DIVISION

Court Receives Order, Disposition Order, Opinion Notification (APL802)

Exchange Description

Appellate courts use this California judicial branch XML schema-based data exchange to send an order, disposition order, or opinion notification to the trial court to take specific action on a case.

The appellate courts may use this data exchange to notify the trial court of:

- An interim order related to a case
- A final order related to a case
- An opinion related to a case

The notification message from the appellate court contains order, disposition order, or opinion information (e.g., CCMS case number, order type, urgent indicator, PDF of the order).

No response message is sent by the trial court upon successful receipt of the request message. Successful delivery of the request message is assumed unless an error in delivery or processing occurs.

Business Response Exchanges

The business response refers to any subsequent exchanges that may occur as a direct result of this exchange.

- There are no business responses to this data exchange.

Error Handling

If the trial court does not successfully receive and process the request message, the integration partner will receive an error message with an error code and error reason.

PROBABLE INTERESTED INTEGRATION PARTNERS

- Appellate Courts—Appellate Court Case Management System (ACCMS)

RELATED EXCHANGES

Related data exchanges are preceding or subsequent data exchanges that may be used by an integration partner as part of the overall business process related to this exchange.

- Court Sends Case Transfer to ACCMS Notification (APL901) data exchange.

For more information about this and other data exchanges, contact integrationpartners@jud.ca.gov

Additional Information

- A single exchange message is sent for each notification.
- The response to this exchange message only occurs after receipt and processing by the integration partner. The only allowable response to this exchange is an error message. The error response message must be sent as a separate message using the error format defined in this exchange.
