Court Sends Case Consolidation De-Consolidation Notification (CAS903)

Exchange Description

Trial courts use this NIEM-based data exchange to send case consolidation or case de-consolidation notifications to an integration partner. For example:

- Case consolidation notification: The trial court consolidates more than one case (e.g., same minor with two cases) into a lead case.
- Case de-consolidation notification: The trial court de-consolidates previously consolidated cases either due to a clerical error or judicial order.

The notification message sent to the integration partner contains the case consolidation de-consolidation information (e.g., CCMS case numbers, lead case indicator, and reason).

No response message is sent by the integration partner upon successful receipt of the request message. Successful delivery of the request message is assumed unless an error in delivery or processing by the integration partner occurs.

Business Response Exchanges

The business response refers to any subsequent exchanges that may occur as a direct result of this exchange.

- There is no separate business response to this exchange.
- The business response is defined within this exchange.

Error Handling

If the integration partner does not successfully receive and process the incoming message, the trial court will receive an error message with an error code and error reason.
