Court Sends Public Defender Case Assignment Notification (CAS904)

Exchange Description

A trial court uses this NIEM-based data exchange to send a public defender or alternate public defender case assignment notification to an integration partner when the public defender has been assigned to a case as a case resource by the trial court.

The notification message sent to the integration partner contains case resource assignment information, including the CCMS case number, case resource of public defender, and defendant information.

If the notification message is successfully received, the integration partner does not send a response message. It is assumed that the notification message was delivered successfully unless an error in delivery or processing occurs.

Business Response Exchanges

The business response refers to any subsequent exchanges that may occur as a direct result of this exchange.

- There is no separate business response to this exchange.

Error Handling

If the integration partner does not successfully receive and process the incoming message, the trial court will receive an error message with an error code and a reason for the error.

PROBABLE INTERESTED INTEGRATION PARTNERS

- Attorney General
- California Department of Revenue and Recovery
- City attorney
- County jails
- District attorney—adult and juvenile
- Probation—adult and juvenile
- Public defender/alternate public defender/entity panels

RELATED EXCHANGES

Related data exchanges are preceding or subsequent data exchanges that may be used by an integration partner as part of the overall business process related to this exchange.

- Court Receives Public Defender Assignment Notification (CAS806), which a public defender or alternate public defender uses to assign or remove an attorney from a defendant's case.

For more information about this and other data exchanges, contact integrationpartners@jud.ca.gov

Additional Information

- A single exchange message is sent for each public defender case assignment notification.

- The response to this exchange message occurs after receipt and processing by the integration partner.

- The only allowable response to this exchange is an error message, which must be sent as a separate message using the error format defined in this exchange.
