2.0 CCMS Data Exchange Functional Error Types

The following table lists all the functional error types that may occur while processing a data exchange message in the ISB and CCMS system. The priority of handling the errors vary by data exchange.

Table 2. CCMS Data Exchange Functional Error Types

Ref	Error Code	Error Type	Data Exchange	System	Error Description	Exception Handling/ Notification Process
09	300000	Business Processing	All Inbound Non-Clerk Review	CCMS	Error Occurred in CCMS system due to failure of semantic validation of data elements sent by the Integration Partner, (e.g., Year should be "YYYY" or BAC Level must be a numerical number between 0.00-0.99 for initiating a citation).	Rejected by CCMS and the errors are sent back to Integration Partner for resolution.
10	400000	Conditional Data	All Inbound Non-Clerk Review	CCMS	This error type indicates all errors that occur in the CCMS system when valid combination of (interdependent) screen elements are not met, (e.g., if case category is "Family Law" then "300" is not a valid .)	Rejected by CCMS and the errors are sent back to Integration Partner or to the Clerk Review module for resolution. Refer to the Comments column in the corresponding Screen Specifications.
11	500000	Business Processing	All Inbound Non-Clerk Review	CCMS	This error type indicates all errors that occur in the CCMS system when business/conditions rules associated with navigation button are not met, thereby disabling subsequent steps in the process.	None of the data exchanges are affected by this error type.
12	600000	Business Processing	All Inbound Non-Clerk Review	CCMS	This error type indicates that the information sent does not uniquely identify a case in CCMS and as a result the case or case related information cannot be updated in CCMS.	Rejected by CCMS and the errors are sent back to Integration Partner for resolution.
13	700000	Business Processing	All Inbound Non-Clerk Review	CCMS	This error type indicates that the information sent does not uniquely identify a participant in CCMS and as result the participant related information cannot be updated in CCMS.	Rejected by CCMS and the errors are sent back to Integration Partner for resolution.
14	800000	Business Processing	All Inbound Clerk Review	CCMS	This error type indicates that the information sent encountered a court policy file validation error and as a result the transaction was rejected and cannot be forwarded to CCMS.	Rejected by the E-Filing Court Policy File Manager and the errors including a rejection code and rejection reason/description are sent back to Integration Partner for resolution.

Ref	Error Code	Error Type	Data Exchange	System	Error Description	Exception Handling/ Notification Process
15	900000	Business Processing	All Inbound DXs	CCMS	This error type indicates that the information sent encountered an error in CCMS. For the participant sent on the DX, either person information or organization information is expected, not both.	Rejected by CCMS and the errors are sent back to Integration Partner for resolution.
16	950000	Business Processing	All Inbound DXs	CCMS	This error type indicates that the court code information is not provided in the message header.	Rejected by CCMS and the error is sent back to Integration Partner for resolution.

3.0 CCMS Data Exchange Related Transactional Errors in the Core

The following table lists errors that may occur while processing a data exchange message in CCMS due to the screen and data validations. These have been extracted from appropriate CCMS Screen Specifications and Business Rule documentation. Additionally some error codes may be repeated since they use a common error framework which parameterizes common errors.
