CCMS-V4

CCMS-V4-INI810 Receive Case Initiation Filing – Family Law (Petition for Custody/Support)

Data Exchange Requirements and Design

CCMS-V4-INI810 Receive Case Initiation Filing – Family Law (Petition for Custody/Support)

1.1.1. Integration Partners
None.

1.1.2. Post JAD Use Cases (Supporting Information)
The forms listed here could and can change in the future.

None.

1.1.3. Receive Case Initiation Filing – Family Law (Petition for Custody/Support) Functional Overview

1.1.3.1. Functional Overview
This section outlines the requirements and functional design for the Receive Case Initiation Filing – Family Law (Petition for Custody/Support) data exchange. This data exchange will be used by the Trial Court to receive a case initiating filing document from an Integration Partner (IP) to initiate a family law case for any of the following case types:

- Establish Parental Relationship
- Custody and Support of Minor Children

The business response to this data exchange indicates successful delivery of the incoming request to the CCMS-V4 system or an error message if an error is encountered. In case of successful delivery, the entire set of request data is echoed back to the Integration Partner (IP) along with a confirmation message. In case of error, an error message is sent back with a description of the error.

The following are possible situations when an Integration Partner may wish to use this data exchange:

- A case participant wishes to establish legal custody of a child.
- A case participant wishes to establish physical custody of a child.
- A case participant wishes to establish visitation restrictions of a child for another participant.
- A case participant wishes to establish a parental relationship.

Figure 1 depicts the use case scenario to be implemented in this data exchange.

**This data exchange is subject to clerk review.**

Figure 1: Receive Case Initiation Filing – Family Law (Petition for Custody/Support) Use Case Diagram

1.1.3.2. Justice Partner forms filed by respective partners (Supporting Information)

The forms listed here could and can change in the future.

None.

1.1.3.3. Related Exchanges

- All amended and additional case filings are received by the Trial Court using the *CCMS-V4-INI816 Receive Subsequent Case Filing* data exchange.

- A subsequent business response to this data exchange will be handled by the *CCMS-V4-EFL902 Send Clerk Review Rejection Notification* or *CCMS-V4-INI929 Send Case Initiation Filing – Family Law (Petition for Custody/Support) Confirmation Notification* data exchanges.

1.1.3.4. Assumptions and Issues

Assumptions:

- None.

Issues and Gaps:

- None.

1.1.3.5. Activity Diagrams

There are three logical systems/actors involved in this data exchange as depicted in *Figure 2* below:

1. CCMS-V4 – California Case Management System-V4 can be physically deployed at the CCTC or at a local court, however from a business view point, the service requirements are the same. Therefore, a single CCMS-V4 system represents both deployment scenarios.

2. ISB – Integration Services Backbone.

3. Integration Partner(s).

Each system is represented by one vertical rectangular area (swim lane) in the diagram. The integration flow comprises six possible activities, A1 through A6, each denoting an actual business activity to be carried out by the system whose swim lane the activity is shown in. The systems communicate with each other using messages M1 and M2, thus each message represents a handshake, a functional behavior, between the two systems it connects.

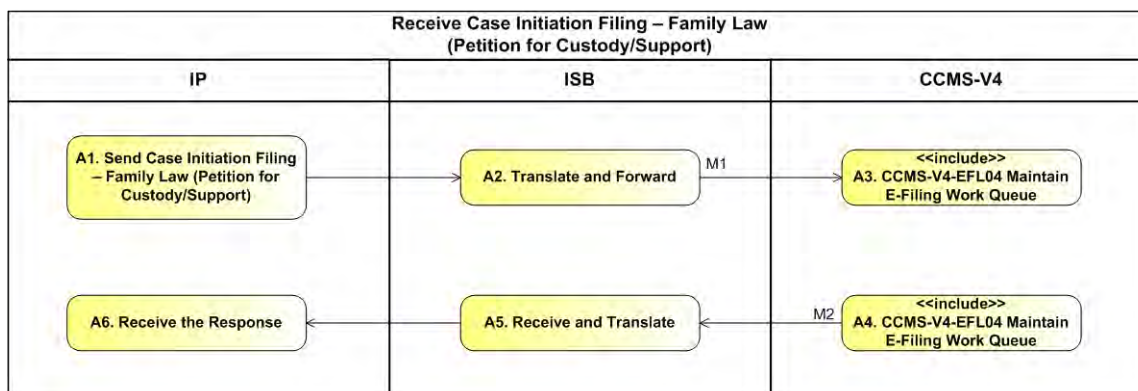

Figure 2: Receive Case Initiation Filing – Family Law (Petition for Custody/Support) Activity Diagram

The following describes the primary flows, messages and alternate flows associated to this data exchange.

Primary Flow of Activities:

- A1 – IP sends the *Receive Case Initiation Filing – Family Law (Petition for Custody/Support)* (action request).

- A2 – ISB receives and facilitates data mapping from CAJUD standard and forwards the action request to CCMS-V4.

- A3 – CCMS-V4 receives the action request and performs validations on the data exchange.

- A4 – CCMS-V4 sends the action response to ISB.
- A5 – ISB receives and facilitates data mapping to CAJUD standard and forwards the action response to the IP.
- A6 – IP receives the action response.

Messages:
- M1 – Message containing the action request – family law (petition for custody/support) case information, (e.g., participant – petitioner, participant – respondent, legal custody information, physical custody information, visitation information, filing document).
- M2 – Message containing the action response – successful delivery confirmation message with the request data information echoed back or error message with a description of the error.

Alternate Flow of Activities:
- Refer to the *CCMS-V4 Data Exchange Business Scenario Patterns* in Data Exchange Section 3 – Data Exchange Functional Design Guidelines for the handling of exceptions.

1.1.3.6. Triggering Events and Conditions

Triggering Event(s):
- An Integration Partner sends the Trial Court the family law filing.
- See Post JAD Use Cases for Integration Partner specific triggering events.

Condition(s):
- None.

1.1.3.7. Subsequent Events and Conditions

Subsequent Event(s):
- Information is forwarded to the CCMS-V4 system and a task is dropped into a work queue for review and subsequent processing of the request by the Actor.
- Please see the Offline Subsequent Event(s) Artifact for additional information.

Condition(s):
- None.

1.1.4. Receive Case Initiation Filing – Family Law (Petition for Custody/Support) Functional Requirements

1.1.4.1. Data Elements, Rules and Mappings

Requirement ID	Requirement Details
CCMS.CaseInitCustSup.F.Mapping.Integration.1	For all applicable parameters, data mapping and business rules refer to the Data Exchange Data Mapping Specification.

Table 1: Data Requirements

1.1.4.2. Integration Requirements

Routing Requirements:

Requirement ID	Routing Conditions	Recipient	Comments
NA	NA	NA	NA

Table 2: Routing Requirements

1.1.4.3. Source and Destination Requirements

Source Requirements:

Requirements for Integration Partner systems are not in the scope of this document.

Destination Requirements:

Refer to the following system use case(s) for all CCMS-V4 system requirements:

- *CCMS-V4-EFL04 Maintain E-Filing Work Queue* System Use Case Specification.

1.1.4.4. Business Service Level Agreements

Requirement ID	Requirement Details
CCMS.CaseInitCustSup.F.SLA.Frequency.Integration.1	Transactions are processed real-time.
CCMS.CaseInitCustSup.F.SLA.Frequency.Source.1	Frequency requirements for Integration Partner systems are not in the scope of this document.
CCMS.CaseInitCustSup.F.SLA.Frequency.Destination.1	Refer to the *CCMS-V4-EFL04 Maintain E-Filing Work Queue* System Use Case Specification for all CCMS-V4 frequency requirements.
CCMS.CaseInitCustSup.F.SLA.Latency.1	No information was provided.
CCMS.CaseInitCustSup.F.SLA.Volume.1	4,800 requests per month across all family law case types.

Requirement ID	Requirement Details
CCMS.CaseInitCustSup.F.SLA.Retry.Integration.1	Not applicable.
CCMS.CaseInitCustSup.F.SLA.Retry.Source.1	Retry requirements for Integration Partner systems are not in the scope of this document.

Table 3: Business Service Level Requirements

1.1.4.5. Business Responses and Acknowledgements

Requirement ID	Requirement Details
CCMS.CaseInitCustSup.F.Integration.BusinessResponse.Integration.1	No business responses are generated by the ISB while processing this data exchange.
CCMS.CaseInitCustSup.F.Integration.BusinessResponse.Destination.1	Refer to the *CCMS-V4-EFL04 Maintain E-Filing Work Queue* System Use Case Specification for all CCMS-V4 business response requirements.
CCMS.CaseInitCustSup.F.Integration.Acknowledgements.Integration.1	Refer to the *CCMS-V4 Data Exchange Business Scenario Patterns* in Data Exchange Section 3 – Data Exchange Functional Design Guidelines for the list of acknowledgments returned by this data exchange.
CCMS.CaseInitCustSup.F.Integration.Acknowledgements.Destination.1	Refer to the *CCMS-V4 Data Exchange Business Scenario Patterns* in Data Exchange Section 3 – Data Exchange Functional Design Guidelines for the list of acknowledgments returned by this data exchange.

Table 4: Business Responses and Acknowledgements Requirements

1.1.4.6. Business Exceptions and Error Summary

Requirement ID	Requirement Details
CCMS.CaseInitCustSup.F.ExceptionHandling.Integration.1	All errors and exceptions are handled by the ISB Exception Handling Common Service.

Requirement ID	Requirement Details
CCMS.CaseInitCustSup.F.ExceptionHandling.Source.1	Exception handling requirements for Integration Partner systems are not in the scope of this document.
CCMS.CaseInitCustSup.F.ExceptionHandling.Destination.1	Refer to the *CCMS-V4-EFL04 Maintain E-Filing Work Queue* System Use Case Specification for all CCMS-V4 exception handling requirements.
CCMS.CaseInitCustSup.F.Error.Integration.1	Refer to the *CCMS-V4 Data Exchange Errors* in Appendix K for a list of all functional errors that could occur in the ISB while processing this data exchange.
CCMS.CaseInitCustSup.N.Error.Integration.1	Refer to the *CCMS-V4 Data Exchange Errors* in Appendix K for a list of all technical errors that could occur in the ISB while processing this data exchange.
CCMS.CaseInitCustSup.F.Error.Destination.1	Refer to the *CCMS-V4-EFL04 Maintain E-Filing Work Queue* System Use Case Specification for all CCMS-V4 functional error requirements.
CCMS.CaseInitCustSup.N.Error.Destination.1	Refer to the *CCMS-V4-EFL04 Maintain E-Filing Work Queue* System Use Case Specification for all CCMS- V4 technical error requirements.

Table 5: Business Exceptions and Error Requirements

1.1.4.7. Legal, Regulatory and Compliance Tracking

No Legal, Regulatory and Compliance requirements have been identified for this data exchange.

1.1.5. Receive Case Initiation Filing – Family Law (Petition for Custody/Support) Non-Functional Requirements

Requirement ID	Requirement Details
CCMS.CaseInitCustSup.N.Pattern.1	This data exchange follows the Request Reply Synchronous (RRS) communication pattern.
CCMS.CaseInitCustSup.N.Sequence.1	This data exchange does not require sequential processing.
CCMS.CaseInitCustSup.N.Duplicate.1	This data exchange requires duplicate message detection.

Table 6: Non-Functional Requirements

Refer to *CCMS-V4 Data Exchange Non-Functional Requirements* in Appendix J for all integration auditing, logging, monitoring, scalability, and security non-functional requirements for this data exchange.
