Court Sends Family Unit Update Confirmation Notification (PF908)

Exchange Description

A trial court uses this California judicial branch XML schema-based data exchange to send an acceptance response to the same integration partner that originated the family unit update request.

The confirmation notification message sent by the trial court to the integration partner contains the family unit update information (e.g., family unit ID, relationship type, and qualifier).

No response message is sent by the integration partner upon successful receipt of the confirmation notification message. Successful delivery of the confirmation notification message is assumed unless an error in delivery or processing by the integration partner occurs.

Business Response Exchanges

The business response refers to any subsequent exchanges that may occur as a direct result of this exchange, as follows:

- There is no business response to this exchange.

Error Handling

If the integration partner does not successfully receive and process the incoming message, the trial court will receive an error message with an error code and error reason.

PROBABLE INTERESTED INTEGRATION PARTNERS

- California Department of Child Support Services
- California Department of Social Services
- Electronic filing service provider

RELATED EXCHANGES

Related data exchanges are any preceding or subsequent data exchanges that may be used by an integration partner as part of the overall business process related to this exchange.

- Court Receives Family Unit Update Request (PF807), which is used by the integration partner to send a family unit update information request to the trial court.

For more information about this and other data exchanges, contact integrationpartners@jud.ca.gov

Additional Information

- A single exchange message is sent for each family unit update confirmation notification.

- The response to this message only occurs after receipt and processing by the integration partner. The only allowable response to this exchange is an error message. The error response message must be sent as a separate message using the error format defined in this exchange.
