# REPORT TO THE JUDICIAL COUNCIL

For business meeting on: October 29, 2010

---

Title	Agenda Item Type
Trial Court Budget: Allocation of Trial Court Funding for FY 2010–2011, and Various Funding Policies and Other Adjustments	Action Required
Rules, Forms, Standards, or Statutes Affected	Effective Date
N/A	October 29, 2010
Recommended by	Date of Report
Trial Court Budget Working Group Administrative Office of the Courts Stephen Nash, Director, Finance Division, and Chair, Trial Court Budget Working Group	October 26, 2010
	Contact
	Stephen Nash, 415-865-7584 <a href="mailto:stephen.nash@jud.ca.gov">stephen.nash@jud.ca.gov</a>

---

### Executive Summary

The Administrative Office of the Courts (AOC) and the Trial Court Budget Working Group (TCBWG) recommend the allocation of funding to the trial courts for fiscal year (FY) 2010–2011. These recommendations are provided in three sections: I. Adjustments for Prior Year Expenditures; II. Budget Allocations for FY 2010–2011; and III. Other Related Information and Recommendations. Due to the delay in the enactment of the State Budget, it is recommended that the council take action at this meeting to enable courts to implement local funding and expenditure plans. Each of these items is discussed in more detail in the following pages.

### Summary of Recommendations

The Administrative Office of the Courts and the Trial Court Budget Working Group recommend (except for recommendation 13, which is a technical item that the TCBWG did not review) that the Judicial Council take the following actions, effective immediately:

## ***I. Adjustments for Prior Year Expenditures***

1. Revise the preliminary allocation of \$5.000 million in the Voluntary Salary Waiver Program (VSWP) by adjusting it to \$4.599 million, the actual level of program savings, and reallocate the funding based on the results of each court's actual program proceeds, based on the following thresholds:
  - Threshold 1: Courts in which judges' VSWP savings exceed 100 percent of the assumed level of savings (\$5.000 million statewide) would be allocated 155 percent of their assumed savings.
  - Threshold 2: Courts in which judges' VSWP savings are between 50 and 100 percent of the assumed level of savings would be allocated 75 percent of their assumed savings.
  - Threshold 3: Courts in which judges' VSWP savings are between 10 and 50 percent of the assumed level of savings would be allocated 30 percent of their assumed savings.
  - Threshold 4: Courts in which judges' VSWP savings are below 10 percent but above zero percent of the assumed level of savings would be allocated 5 percent of their assumed savings.
  - Threshold 5: Courts in which judges' VSWP savings are zero percent of the assumed level of savings would be allocated zero percent of the overall savings in the program.(This adjustment is displayed in column J of Attachment 1.)
2. Approve a policy that \$4.839 million in savings associated with the court interpreters reimbursement program in FY 2009–2010, and any future program savings, be set aside and made available to address future reimbursable court interpreter costs, including base funding.
3. Approve adjusting the cost of administrative fees related to the Judicial Branch Workers' Compensation Program (JBWCP) so that all administrative costs are distributed across the entire program proportionately.
4. Approve use of credits received from excess premium and third party administrator charges for fiscal years 2008–2009 and 2009–2010, a combined amount of \$285,400, to partially offset combined workers' compensation program charges of \$513,098, with the remaining deficit of \$227,698 to be absorbed by the Judicial Branch Workers' Compensation Fund.

## ***II. Budget Allocations for FY 2010–2011***

5. Approve the use of \$6.000 million, on a one-time basis in FY 2010–2011, from Trial Court Trust Fund (TCTF) reserves to offset the impact of additional reductions to trial court funding and to partially offset the impact of this year's late budget implementation upon revenues from new fees and fee increases, as follows:
  - \$36.000 million from Trial Court Trust Fund (TCTF) reserves;
  - \$31.600 million from special funds (TCTF, Trial Court Improvement Fund, or Judicial Administration Efficiency and Modernization Fund); and

- \$98.400 million from facility program funds – \$25.000 million from the State Court Facilities Construction Fund, and \$73.400 million from the Immediate and Critical Needs Account.
6. Approve the following allocation on a pro rata basis (see columns E and F of Attachment 2):
    - \$96.313 million in one-time funding as an offset to court funding reductions; and
    - \$17.981 million in ongoing funding as an offset to court funding reductions.
  7. Allocate \$1.375 million from the TCTF to offset the overall security funding shortfall.
  8. Adjust individual court allocations for security in the amount of \$14.798 million to reflect anticipated cost adjustments for FY 2010–2011 (see column G of Attachment 2).
  9. Allocate a security funding shortfall of \$12.726 million to all courts based upon each court’s share of the total statewide security funding (see column H of Attachment 2), replacing the \$10.257 million reduction from FY 2009–2010.
  10. Distribute funding to courts once the court has provided documentation to AOC staff verifying that security compensation and retirement cost increases are confirmed and ratified. As in previous years, some of the projected court security cost increases are based on projected cost changes for security employee compensation and retirement that have not been confirmed or ratified, and thus may be subject to adjustment.
  11. Approve two one-time transfers to the Court-Appointed Dependency Counsel Program as follows: (a) \$7.075 in FY 2010–2011; and (b) \$3.538 million in FY 2011–2012.

***III. Other Related Information and Recommendations***

12. Approve revisions to the Trial Court Fund Balance Policy (see Attachment 4), which incorporate revised fund balance classifications consistent with the Governmental Accounting Standards Board’s Statement No. 54, for implementation commencing in FY 2010–2011.
13. Delegate authority to the Administrative Director of the Courts to make minor or technical one-time and ongoing allocations and adjustments to allocations of funds to courts, as necessary, to address unanticipated needs and contingencies and to reflect updated cost estimates, to the extent that sufficient funding is available. Adjustments made under this provision will be reported to the council after the end of the fiscal year.

## **I. Adjustments for Prior Year Expenditures**

### **Recommendation 1: Voluntary Salary Waiver Program**

1. Revise the preliminary allocation of \$5.000 million in the Voluntary Salary Waiver Program (VSWP) by adjusting it to \$4.599 million, the actual level of program savings, and reallocate the funding based on the results of each court's actual program proceeds, based on the following thresholds:
  - Threshold 1: Courts in which judges' VSWP savings exceed 100 percent of the assumed level of savings (\$5.000 million statewide) would be allocated 155 percent of their assumed savings.
  - Threshold 2: Courts in which judges' VSWP savings are between 50 and 100 percent of the assumed level of savings would be allocated 75 percent of their assumed savings.
  - Threshold 3: Courts in which judges' VSWP savings are between 10 and 50 percent of the assumed level of savings would be allocated 30 percent of their assumed savings.
  - Threshold 4: Courts in which judges' VSWP savings are below 10 percent but above zero percent of the assumed level of savings would be allocated 5 percent of their assumed savings.
  - Threshold 5: Courts in which judges' VSWP savings are zero percent of the assumed level of savings would be allocated zero percent of the overall savings in the program.(This adjustment is displayed in column J of Attachment 1.)

#### **Previous council action**

In FY 2009–2010, the Legislature approved reductions to trial court funding of \$360.809 million. The Legislature, in response to concerns raised by Judicial Branch leadership regarding the size of the cuts, approved measures to partially reduce the impact to courts of these cuts. One such measure was approval of statutory authority for the council to mandate one-day-per-month statewide court closures in FY 2009–2010. In response to the need to assist courts in reducing costs, the council approved a statewide court closure plan. As part of this overall approach, judges were invited to participate in reductions of compensation consistent with the level of impacts to be experienced by court employees. In order to provide judges who elected to participate a means for doing so, the council established a statewide Voluntary Salary Waiver Program (VSWP). Because the State Controller pays the cost of salaries and benefits for judges directly from the Trial Court Trust Fund (TCTF), savings from judges that participated in the program accumulated in that statewide fund.

The council's action was premised on a commitment that the entire funding saved from judicial participation in the VSWP would be allocated to courts for purposes of offsetting court funding reductions. The AOC preliminarily estimated annual savings from the VSWP would total approximately \$5.000 million. Based on this information, the council, at its July 29, 2009, business meeting, approved allocation of the estimated \$5.000 million as an offset, on a preliminary basis, with the understanding that the allocation would be subsequently adjusted based on actual savings achieved in the program. (See column A of Attachment 1.)

### **Rationale for recommendation 1**

The initial preliminary allocation adjusted all courts equally, based on each court's pro rata share of the total statewide nonsecurity funding. At the time the initial allocation was made, the fact that judges in some courts would participate in the statewide VSWP only minimally or not at all was not anticipated, and thus it was assumed that a pro rata distribution of program proceeds to all courts was an equitable approach, at least initially. Subsequent to the initial distribution, however, various courts announced local judicial donation programs that judges could participate in, in place of the statewide VSWP. Because a feature of some of these local programs is that funds be made available to the court locally to address funding needs, other courts without these local donation programs indicated concern that the pro rata allocation of VSWP proceeds meant that their judges were, in effect, subsidizing other courts that received not only the proceeds from local judicial donation programs, but also an equal share of the total statewide VSWP proceeds. Also, it has been determined that the actual proceeds from judicial participation in the VSWP in FY 2009–2010 totaled \$4.599 million. (See column B of Attachment 1.) Because this amount is below the initial estimate of \$5.000 million, the total statewide allocation needs to be adjusted.

The recommended adjustment would address both (1) the adjustment of the overall allocation to reflect lower actual savings; and (2) a more equitable distribution of program proceeds.

### **Alternatives considered and policy implications**

An alternative considered by staff and the TCBWG would not apply thresholds, but instead would adjust each court's share of the preliminary \$5.000 million statewide allocation based on each court's pro rata share of statewide nonsecurity funding to reflect actual VSWP proceeds. While this option would adjust each court's allocation to reflect actual program proceeds, it would not reallocate funding to reflect significant differences in the level of participation of each court's judges in the VSWP. For this reason, this option is not recommended.

### **Recommendation 2: Court Interpreters**

2. Approve a policy that \$4.839 million in savings associated with the court interpreters reimbursement program in FY 2009–2010, and any future program savings, be set aside and made available to address future reimbursable court interpreter costs, including base funding.

### **Rationale for recommendation 2**

The FY 2009–2010 court interpreter appropriation from the TCTF was \$92.794 million. On August 20, 2010, an annual year-end court interpreter adjustment survey was sent to all 58 trial courts. In this survey, courts identify and certify prior year interpreter expenditures that are eligible for reimbursement. In the surveys, courts certified statewide expenditures of \$87.955 million in FY 2009–2010, which resulted in one-time savings of approximately \$4.839 million. The savings appear to be largely attributed to the 10 statewide court closure days instituted by the Judicial Council at its July 29, 2009, meeting. Had these and perhaps other measures not been implemented, interpreter costs would have been higher.

Total statewide expenditures eligible for reimbursement during FY 2009–2010, based on court certified surveys received from all 58 superior courts, and savings are identified below.

FY 2009–2010 Court Interpreter Appropriation	\$ 92,794,000
Less Expenditures Eligible for TCTF Reimbursement	\$ (87,955,067)
FY 2009–2010 Savings	\$ 4,838,933

With respect to the total statewide reimbursable costs for the interpreter program in FY 2010–2011, expenditures are expected to increase above FY 2009–2010 expenditure levels. Expenditures increased by 6.38 percent from FY 2006–2007 to FY 2007–2008 and an additional 5.91 percent from FY 2007–2008 to FY 2008–2009, when costs exceeded the appropriation by \$911,893. In that year, the Judicial Council approved a one-time allocation of up to \$1.000 million from statewide special funds to cover the shortfall. Given this historical experience, and since most of the savings in FY 2009–2010 resulted from the statewide one-day-per-month court closures, it is expected that any savings in this program will be substantially lower this fiscal year.

**Alternatives considered and policy implications**

No alternatives were considered.

**Recommendations 3–4: Judicial Branch Workers’ Compensation Program**

3. Approve adjusting the cost of administrative fees related to the Judicial Branch Workers’ Compensation Program (JBWCP) so that all administrative costs are distributed across the entire program proportionately.
4. Approve use of credits received from excess premium and third party administrator charges for fiscal years 2008–2009 and 2009–2010, a combined amount of \$285,400, to partially offset combined workers’ compensation program charges of \$513,098, with the remaining deficit of \$227,698 to be absorbed by the Judicial Branch Workers’ Compensation Fund.

**Rationale for recommendations 3–4**

The Workers’ Compensation Oversight Committee meets once a year for the purpose of reviewing the program’s prior year claims audit, actuarial evaluation, and the next fiscal year’s premium allocation distribution to the trial courts. The oversight committee met on May 14, 2010, and, as a result of the annual review of program results and expected costs, determined that some minor adjustments to the allocation methodology were necessary. The oversight committee presented recommendations to the TCBWG at its July 9, 2010, meeting and proposed that the adjustments be implemented beginning in FY 2010–2011.

**Allocation to courts of administrative costs:** Program costs include administrative fees for claims handling provided by a third party administrator (TPA) and administrative fees for the consultation and brokering of the program (broker fees). Recommendation 3 proposes that the cost for these fees be adjusted so that 100 percent of the cost would be distributed across all participating organizations in the program using the same methodology.

**Allocation of insurance costs:** Recommendation 4 proposes, on a one-time basis, the consideration for retaining the total credit adjustments for fiscal years 2008–2009 and 2009–2010 in the amount of \$285,400. This credit amount would be applied to the overall additional plan charges in the amount of \$513,098. Combining the credits and the charges equals a net charge of \$227,698 to be absorbed by the JBWCP.

## **II. Budget Allocations for FY 2010–2011**

### **Recommendations 5–6: Restored Funding Allocation**

5. Approve the use of \$166.000 million in special funds, on a one-time basis in FY 2010–2011, to offset the impact of additional reductions to trial court funding and to partially offset the impact of this year’s late budget implementation upon revenues from new fees and fee increases, as follows:
  - \$36.000 million from Trial Court Trust Fund (TCTF) reserves;
  - \$31.600 million from special funds (TCTF, Trial Court Improvement Fund, or Judicial Administration Efficiency and Modernization Fund); and
  - \$98.400 million from facility program funds – \$25.000 million from the State Court Facilities Construction Fund, and \$73.400 million from the Immediate and Critical Needs Account.
  
6. Approve the following allocation on a pro rata basis (see columns E and F of Attachment 2):
  - \$96.313 million in one-time funding as an offset to court funding reductions; and
  - \$17.981 million in ongoing funding as an offset to court funding reductions.

### **Rationale for recommendations 5–6**

There are two major components to this allocation item: (1) identifying the impact of new funding and funding transfers, as well as new reductions, upon the overall ongoing reduction to trial court funding; and (2) determining how to allocate one-time and ongoing funding to courts as partial restoration of court funding that was previously reduced.

**Identifying the net impact of funding changes in this year’s budget.** The Budget Act of 2010 (Stats. 2010, ch. 712) includes new unallocated reductions, funding offsets in the form of new and increased fees to generate additional revenue, and one-time transfers of statewide trial court special funds to mitigate the impact of the reductions on trial court funding allocations.

Including the reduction of \$360.800 million to trial court funding approved by the Legislature in FY 2009–2010, the net impact in FY 2010–2011 of the new reductions and offsets is a reduction of \$68.757 million to trial court operations (nonsecurity) allocations. Below is a description of each of the trial court funding reductions and funding offsets included in the identification of the reduction amount.

*Unallocated Reductions to Trial Court Funding (\$315.809 million).* Unallocated reductions include:

- Ongoing reduction: The 2009 Budget Act includes an ongoing reduction of \$260.809 million to trial court funding (\$92.240 million and \$168.569 million). (Note: the 2010–2011 Governor’s proposed budget included continuation of an additional \$100 million in reductions. This amount was ultimately not included in the budget.)
- New ongoing reduction (\$25.000 million): The 2010 Budget Act includes a new ongoing reduction of \$25.000 million to trial court funding.
- Additional reduction (\$30.000 million): The 2010 Budget Act includes a reduction of \$30.000 million from the General Fund transfer to the Trial Court Trust Fund (TCTF).

*Funding Offsets (\$247.052 million).* These funding offsets include:

- One-time offsets (\$160.000 million), as follows:
  - \$130.000 million: The 2010 Budget Act specifies that the Judicial Council provide one-time funding offsets of (1) a total of \$31.600 million to be identified from the TCTF, Judicial Administration Efficiency and Modernization Fund, and Trial Court Improvement Fund; (2) \$25.000 million from the State Court Facilities Construction Fund; and (3) \$73.400 million from the Immediate and Critical Needs Account, as a means of mitigating the impact of reductions to courts in FY 2010–2011.
  - \$30.000 million: The AOC is recommending an additional allocation of \$30.000 million from the TCTF to offset the impact to courts of the \$30.000 million reduction added as part of the final action by the Legislature on the budget. This funding has been identified as available based upon a review of state fund revenues, expenditures, and carryover fund balance.
- Estimated new/increased fee revenue (\$66.290 million), as follows:
  - \$5 first paper fee increase (\$6.500 million): Trailer bill language (SB X4 13) associated with the 2009 Budget Act provides a permanent \$5 first paper civil filing fee increase related to court reporters. The revenue from this fee increase is estimated to be \$6.500 million in FY 2010–2011.
  - \$10 postjudgment/miscellaneous fee increase (\$8.400 million): Trailer bill language (SB X4 13) associated with the 2009 Budget Act increases by \$10 fees authorized by Government Code section 70626. The revenue from this fee increase is estimated to be \$8.400 million in FY 2010–2011. Starting in FY 2011–2012 revenue from this fee increase must be used for the Sargent Shriver Civil Counsel Act.

- \$300 summary judgment motion fee increase (\$4.378 million): Trailer bill language (SB 857; Stats. 2010, ch. 720) associated with the 2010 Budget Act provides a \$300 increase to the current \$200 fee authorized by Government Code section 70617(d). The revenue from this fee increase is estimated to be \$4.378 million in FY 2010–2011 (8.5-month implementation) and \$6.180 million in FY 2011–2012 (12-month implementation). The fee increase will sunset on June 30, 2013.
- New \$20 telephonic appearance fee (\$4.271 million): Trailer bill language (SB 857) associated with the 2010 Budget Act provides a new \$20 fee for telephonic appearances. The revenue from this new fee is estimated to be \$4.271 million in FY 2010–2011 (8.5-month implementation) and \$6.030 million in FY 2011–2012 (12-month implementation). The fee will sunset on June 30, 2013.
- \$20 and \$40 first paper fee increase (\$28.404 million): Trailer bill language (SB 857) associated with the 2010 Budget Act provides a \$20 increase on fees for limited civil cases under \$10,000 and a \$40 increase on fees for unlimited and limited civil cases above \$10,000 authorized by various Government Code sections. The revenue from these new fees is estimated to be \$28.404 million in FY 2010–2011 (8.5-month implementation) and \$40.100 million in FY 2011–2012 (12-month implementation). The fee increase will sunset on June 30, 2013.
- \$250 pro hac vice fee increase (\$531,250): Trailer bill language (SB 857) associated with the 2010 Budget Act provides a \$250 increase to the current \$250 fee authorized by Government Code section 70617(e). The revenue from this fee increase is estimated to be \$531,250 in FY 2010–2011 (8.5-month implementation) and \$750,000 in FY 2011–2012 (12-month implementation). The fee increase will sunset on June 30, 2013.
- New \$3 parking citation penalty (\$7.806 million): Trailer bill language (SB 857) associated with the 2010 Budget Act provides for a \$3 parking citation penalty. The revenue from this new penalty is estimated to be \$7.806 million in FY 2010–2011 (6.5-month implementation) and \$11.020 million in FY 2011–2012 (12-month implementation). This penalty will sunset on June 30, 2013.
- As a result of the delayed enactment of this year’s budget and associated budget trailer legislation, fee revenue increases discussed above will not be implemented for a full year in FY 2010–2011. Consistent with a staff recommendation which was approved by the council in FY 2009–2010 under similar circumstances, the AOC is recommending an allocation of \$6.000 million from Trial Court Trust Fund reserves to partially offset the impact of the delayed implementation of the fee changes.
- Allocation of a portion of the overall reduction to security and other programs (\$20.762 million), as follows:
  - \$3.713 million is the pro rata share of the reduction related to other TCTF and General Fund programs, including jury, grants, and prisoner hearings.

- \$17.049 million is the pro rata share of the overall reduction related to the security base allocation.

*Net Reductions to court allocations for FY 2010–2011.* With funding offsets and allocations that total \$247.052 million, the total net reduction to court allocations in FY 2010–2011 is \$68.757 million. In FY 2009–2010, the council approved an allocation of ongoing reductions to courts of \$190.127 million. Because the ongoing reduction exceeds the current computed reduction, there is approximately \$121.370 million in restored funding available for allocation for court operations. However, if, as recommended by the AOC and the TCBWG (see discussion of Recommendation 11 in this report), a portion of the restored funding is used to fund the estimated current-year shortfall of \$7.075 million in the court-appointed dependency counsel program, the total net reduction to court allocations in FY 2010–2011 would be \$75.832 million and the funding available to offset reductions would be \$114.295 million. While most of this funding to restore cuts to courts is one-time in nature, \$17.981 million of this proposed allocation would be an ongoing restoration of court cuts.

(Note: the recommended offset amounts are slightly lower – \$4.000 million funding restoration, \$1.000 million security – than was discussed with the Trial Court Budget Working Group. These slightly amended recommendations result from additional careful staff review of TCTF revenue projections.)

The following table displays the various reductions and offsets identified in the discussion above.

<b>I. Base Reductions</b>	<b>FY 2010–2011</b>	
Baseline Reduction—FY 2009–10	-92,240,000	
Baseline Reduction—FY 2009–10	-168,569,000	
New Ongoing Reduction	-25,000,000	
Additional Reduction	-30,000,000	
	-315,809,000	-315,809,000
<b>II. Funding Transfers</b>		
Special Funds (TCTF, TCIF, or Modernization)	31,600,000	
Construction Funds	98,400,000	
TCTF—Revenue and Expenditure Adjustments	30,000,000	
	160,000,000	160,000,000
<b>III. New Revenues</b>		
<b>2009 Budget Act</b>		
\$5 First Paper Filing Fee	6,500,000	
\$10 Post Judgment/Misc Fees (thru 2010–11)	8,400,000	
<b>2010 Budget Act</b>		
Summary Judgment	4,377,500	
Telephonic Hearing	4,271,250	
First Paper Filing	28,404,167	
Pro Hac Vice	531,250	
Parking Citation	7,805,833	
<i>Funding from TCTF for Partial-Year Receipts</i>	6,000,000	
Estimated New/Increased Fee Revenue	66,290,000	66,290,000
<b>Total Reduction</b>		<b>-89,519,000</b>
<b>IV. Reduction Adjustments</b>		
Add: Share of Reduction - Other Programs		3,713,000
Add: Security Share of Reduction		17,049,000
Reduction to Court Allocations		-68,757,000
Less: One-time Offset – Court-Appointed Counsel		-7,075,000
<b>Net Operations Reduction</b>		<b>-75,832,000</b>
Less: 2009–2010 Court Ongoing Reduction Allocation		-190,126,592
<b>Court Funding Restoration</b>		<b>114,294,592</b>
Ongoing Allocation		17,980,975
One-Time Allocation		96,313,617

*Allocating the reduction offset of \$114.295 million.* Two options for allocating the ongoing reduction offset were considered. They are described below.

*Option 1 – 100 Percent Pro Rata:* Allocate the reduction offset of \$114.295 million based on each court's pro rata share of statewide nonsecurity funding.

*Option 2 – Pro Rata and Reduction of RAS Underfunding to 25 Percent:* Allocate the funding restoration of \$114.295 million using the methodology described in Option 1. In addition, make funding adjustments based on funding needs indicated in the FY 2010–2011 Resource Allocation Study (RAS) model. Specifically, courts that are more than 25 percent underfunded according to the RAS model would receive an ongoing funding adjustment to reduce their underfunding to 25 percent. This would marginally reduce the allocations to courts that were identified as less than 25 percent underfunded.

Under this approach, \$110.637 million of the reduction offset of \$114.295 million (or 96.80 percent) would be allocated according to each court's pro rata share of statewide nonsecurity funding and \$3.658 million (or 3.2 percent) of the reduction offset would be allocated according to the funding needs indicated in the FY 2010–2011 RAS model. (See columns E, F, G, and H of Attachment 3.)

As background, at its July 28, 2009 meeting, the Judicial Council approved an allocation of a \$190.127 million reduction to all courts based on each court's relative share of the FY 2009–2010 nonsecurity base allocation. Staff were directed to return to the council with options for lessening the impact of the reduction allocated to the most underresourced courts, with consideration given to the level of these courts' fund balances. Subsequently, at its August 14, 2009, business meeting, the council approved a one-time offset for the Superior Court of San Joaquin County, which was identified as a court that was one of the lowest resourced courts using the RAS model, that also had limited reserves. At the same time, the council approved distribution of a corresponding one-time reduction increase to each of the other 57 courts, based on their proportionate share of the original \$190.127 million ongoing reduction.

For this year's allocation of restored funding, the AOC and the TCBWG recommend that the Judicial Council approve Option 1, which would apply a straight pro rata adjustment to all courts, as an equitable means of allocating the restored funding. This approach would not, however, reduce the impact to courts that are relatively less resourced, and those that have minimal fund balances. One reason for not recommending Option 2 this fiscal year is that there is concern that the RAS methodology and data need to be updated. An updated process for allocating funding for underresourced courts might be developed based on the efforts of the AOC's Office of Court Research, which is currently working on a project to evaluate workload for case processing staff in the trial courts. In addition, because the funding available for allocation represents a restoration of cuts incurred by the courts, rather than new funding, and most of that is available on a one-time basis only, it appears appropriate to restore funding to courts on a pro rata basis, consistent with how the initial reductions were implemented.

### **Alternatives considered and policy implications**

As discussed above, an alternative was considered that would provide a special allocation to the most underresourced courts. Because (1) this funding represents a restoration of court operations funding previously reduced from court allocations, and (2) underresourced courts will still receive a significant offset under the pro rata option preferred by the majority of TCBWG members, this alternative allocation approach was not recommended.

### **Recommendations 7–10: Security**

7. Allocate \$1.375 million from the TCTF to offset the overall security funding shortfall.
8. Adjust individual court allocations for security in the amount of \$14.798 million to reflect anticipated cost adjustments for FY 2010–2011 (see column G of Attachment 2).
9. Allocate a security funding shortfall of \$12.726 million to all courts based upon each court's share of the total statewide security funding (see column H of Attachment 2), replacing the \$10.257 million reduction from FY 2009–2010.
10. Distribute funding to courts once the court has provided documentation to AOC staff verifying that security compensation and retirement cost increases are confirmed and ratified. As in previous years, some of the projected court security cost increases are based on projected cost changes for security employee compensation and retirement that have not been confirmed or ratified, and thus may be subject to adjustment.

### **Rationale for recommendations 7–10**

For FY 2009–2010 security base funding totaled \$507.580 million. This base includes \$30.599 million in one-time security funding to address ongoing security costs and \$7.200 million in unfunded security allocations for FY 2009–2010. In addition, based on the annual cost survey of courts and sheriffs submitted during spring 2010, \$14.798 million is needed to fund FY 2010–2011 cost increases associated with salary and benefit changes for existing court security programs. The following funding offsets are available to mitigate this overall cost impact:

1. One-time funding totaling \$2.641 million. This amount includes prior year savings from ongoing funding of (a) new entrance screening stations included in the Budget Act of 2006 (Stats. 2006, ch. 47) that are not yet implemented, and (b) screening stations for new facilities that are not yet implemented.
2. Ongoing new funding from increases to the security fee authorized by Penal Code section 1465.8. The increase from \$20 to \$30 implemented in FY 2009–2010 is estimated to generate \$36.528 million, and the increase from \$30 to \$40 implemented as part of the 2010–2011 State Budget, is estimated to generate \$16.375 million in FY 2010–2011. (The latter increase will sunset June 30, 2011.)

Beyond these amounts, no new funding was provided by the Legislature to address cost increases in the court security program.

In order to determine the statewide allocation of security funding, a Court Security Survey was sent to the trial courts in May 2010. In response to the survey, the courts and sheriffs provided cost information for:

- salaries;
- pay differentials;
- overtime;
- benefits;
- retirement; and
- services and supplies and other costs.

This information was used to estimate the change in costs that will be incurred by courts for the *existing security service level*.

***Analysis of Requests.*** The AOC reviewed the surveys, and consistent with the funding approach that was recommended by the Working Group on Court Security and approved by the Judicial Council in 2007, the following principles were applied in developing the statewide security funding recommendations:

1. Security staffing changes in excess of the prior year levels cannot be accommodated within the limited funding. This does not apply to courts that received separate security allocations such as for entrance screening. As in prior years, funding standards for security equipment, supplies and services, professional services, and vehicle costs were utilized. Any costs above standards were not included in recommended funding.
2. All items that are not specifically authorized in Government Code section 69927 were not recommended. This includes all costs listed in Section 14.01 of the *Trial Court Financial Policies and Procedures Manual*, page 25, Section II: Non-Allowable Cost Narratives. Examples include costs for flashlights, parking, tasers, and basic training for new personnel assigned to the court.
3. Only allowable equipment, services, supplies, and benefits that have been previously paid by the courts were included in the AOC funding recommendations, consistent with existing law.

Based on this methodology, statewide cost increases for security for existing service levels are projected to be a net of \$14.798 million in FY 2010–2011. Some of that projected net increase is based on contracts that have yet to be ratified or on estimated cost-of-living increases that will be finalized at a later date. This amount may be, consequently, subject to minor adjustment.

***Funding Shortfall.*** As identified in the table below, projected court security costs in the state exceed security funding by \$14.101 million. To partially address this shortfall, the AOC

recommends a one-time allocation of TCTF monies representing a portion of the loss of revenues related to the late implementation of the new security fee increase (increasing the fee from \$30 to \$40). The proposed adjustment from TCTF would be \$1.375 million. If this recommended adjustment is included in the calculation, the net shortfall would be \$12.726 million. From a technical standpoint, approval of the recommendations would result in reversal of the \$10.257 million shortfall in security funding allocated to courts in FY 2009–2010 and, instead, allocation of the \$12.726 million shortfall for this year. In total, though, there would be an actual overall increase in the security budget of approximately \$13 million over the budget for FY 2009–2010.

**Trial Court Security Costs FY 2010–2011**

Security Base Allocations FY 2009–2010	\$	507,579,640
Add: FY 2009–2010 Allocations	\$	7,199,609
FY 2010–2011 Projected Funding Changes	\$	14,798,196
Projected Security Costs FY 2010–2011	\$	<u>529,577,445</u>

**Trial Court Security Funding FY 2010–2011**

Security Base Allocations FY 2009–2010	\$	507,579,640
Less: Unfunded Ongoing Costs		-30,599,056
Share of Statewide Unallocated Reduction		-17,049,000
Add: Estimated Security Fee Increase Revenue (\$20 to \$30)		36,528,435
Estimated Security Fee Increase Revenue (\$30 to \$40)		16,375,000
Undistributed Perimeter Screening Funds		2,641,311
FY 2010–2011 Security Funding	\$	<u>515,476,330</u>
Projected Security Funding Shortfall FY 2010–2011	\$	-14,101,115
Add: <i>Funding from TCTF for Partial-Year Receipts</i>		<u>1,375,000</u>
<b>Proposed Net Shortfall</b>	\$	<u>-12,726,115</u>

**Alternatives considered and policy implications**

An alternative to this recommendation considered by the AOC and the TCBWG was to not allocate additional TCTF funding to partially offset the late implementation of the FY 2010–2011 security fee increase. This alternative was not recommended, because the council approved a similar recommendation to offset lost funding last year, and TCTF monies are available to address some of the funding need.

## Recommendation 11: Court-Appointed Dependency Counsel

11. Approve two one-time transfers to the Court-Appointed Dependency Counsel Program as follows: (a) \$7.075 million in FY 2010–2011; and (b) \$3.538 million FY 2011–2012.

### Rationale for recommendation 11

Fiscal year 2009–2010 court-appointed counsel program expenditures totaled \$110.808 million, an amount that exceeds the baseline budget for this program of \$103.725 million by approximately \$7.075 million. Program costs have exceeded baseline funding available for the program for the last six fiscal years; full funding has been achieved via one-time transfers from other court operations areas in each of the last five years. For FY 2010–2011, staff projects program expenditures will remain at the levels experienced in FY 2009–2010. However, this amount would exceed baseline resources by \$7.075 million.

Since FY 2004–2005, annual court-appointed counsel expenditures have exceeded the funding available for this program. The shortfall had been growing; expenditures exceeded available funding in FY 2004–2005 by 3 percent, while FY 2009–2010 costs exceeded available funding by approximately 7 percent. Current year expenditure levels, though, are expected to be equal to prior year costs. Also, current year expenditures are projected to be below the historical program high of \$114.049 million in FY 2008–2009. The table below displays the base funding available, actual (or projected) expenditures in the program, and the amount of one-time funding approved by the Judicial Council to address program shortfalls. Because of the timing of the request for additional funding, the amount approved by the council may have exceeded the eventual final program costs in a year.

Fiscal Year	Court-Appointed Counsel Base Funding	Actual or Projected Expenditures*	One-Time Funding Approved by JC
2004–2005	\$85,392,000	\$88,237,426	\$0
2005–2006	90,890,951	96,538,577	13,655,000
2006–2007	94,912,559	105,302,646	10,390,087
2007–2008	99,885,977	112,377,705	12,483,000
2008–2009	103,725,445	114,049,221	9,270,000
2009–2010	103,725,445	110,808,348	9,280,000
2010–2011	103,725,445	110,808,348	pending
2011–2012	\$103,725,445	\$110,808,348	pending

\* Source: AOC’s Center for Families, Children & the Courts.

Attaining adequate funding for dependency counsel has been a council priority for several years. In addition, the need for resources in this area has been a focus of litigation. As a result, when new funding was made available in prior years, resources for this program were increased in amounts that were in excess of increases in other trial court programs. In the past two years, the

program did not sustain reductions consistent with reductions in other programs, and expenditure shortfalls were addressed with available one-time funding.

Because it takes some time to negotiate funding changes to dependency counsel provider contracts, this recommendation would include one-time allocations for this year and next fiscal year as well.

### **Alternatives considered and policy implications**

Four alternatives to the recommendation were considered: (1) a transfer of \$7.075 million in FY 2010–2011 and a permanent transfer of \$3.538 million in FY 2011–2012; (2) a one-time transfer of funding to the program in the amount of \$7.075 million in FY 2010–2011 with no consideration of additional funding in FY 2011–2012; (3) no additional funding to the program in FY 2010–2011 maintaining it at its base of \$103.725 million; and (4) no additional funding in FY 2010–2011 and applying a proportionate share of the FY 2010–2011 ongoing reduction to the program.

These alternatives were not supported for various reasons. Based on the allocation methodology used in the program that was approved by the Executive and Planning Committee on behalf of the Judicial Council in June 2008, alternatives 3 and 4 would result in reductions of up to 12 and 15 percent, respectively, for some court systems. Such cuts would be difficult for courts to absorb, given that the first quarter of the current year has already closed, and these cuts were not noticed or accounted for in court contracting decisions. For this reason, neither of these alternatives are recommended. Alternative 2 would not provide any relief for FY 2011–2012. Based on the fact that program costs for each of the past six years have exceeded the current program base budget, and that it takes significant time to renegotiate contracts with providers to bring costs down, this option is also not recommended. The Trial Court Budget Working Group recommended that additional funding not be permanently allocated to the program (as in alternative 1) until a working group has a chance to look into the program in more depth and determine what the cost drivers were and establish best practices to handle these types of cases. In an effort to accomplish this goal, the working group established a subcommittee to review the costs and operation of this program in order to identify potential savings and efficiencies. The subcommittee will report back to the working group at a future meeting.

### **Program Update (information only)**

#### **Employee retirement, retiree health, and health benefits**

From FY 2005–2006 through 2008–2009, the Trial Court Trust Fund received new monies based on either the adjustment to the State Appropriations Limit (SAL) or the Consumer Price Index (CPI). These funds were allocated to trial courts to address court operational costs. As part of the Legislature’s response to the state’s current difficult fiscal challenges, these adjustments were suspended beginning in FY 2009–2010. Subsequent to this change, AOC staff met with Department of Finance (DOF) staff to identify a process to fund, on an ongoing basis, nondiscretionary court baseline cost changes in areas such as employee retirement, retiree health,

and health benefits. These are costs that are generally funded for executive branch agencies. As a result of these discussions, an ongoing process was proposed to fund these nondiscretionary cost areas. In addition, the 2010–2011 Governor’s budget proposed baseline increases for these costs based upon preliminary court estimates. The Legislature reviewed these proposed changes and appropriated funding for the costs in the 2010 Budget Act.

The AOC surveyed the courts in the spring of 2009 to obtain information on FY 2009–2010 and preliminary 2010–2011 cost changes for employee retirement, retiree health, and health benefits. (For health benefits, courts were resurveyed in September 2009 to obtain updated information, as many courts did not have confirmed information at the time of the original survey because the effective date of change for many of the benefits was January 1, 2010.) Based upon these surveys, the following funding need in these areas was submitted to the DOF in late fall 2009, and subsequently included in the Governor’s proposed budget for FY 2010–2011:

Retirement	\$ 6,663,905
Retiree Health	327,465
Health Benefits	<u>10,870,854</u>
Total:	<u>\$17,862,223</u>

The Budget Act of 2010 (Stats. 2010, ch. 712) includes \$17.862 million to address these needs. However, because these amounts were preliminary and largely reflected FY 2009–2010 cost changes, the AOC surveyed courts in late spring of 2010 to obtain updated cost estimates for FY 2010–2011. The AOC has compiled and reviewed this information. Based upon this review, the level of projected and confirmed cost increases for FY 2010–2011 and 2011–2012 for retirement, retiree health, and health benefits is identified in the table below.

<b>Trial Court Unfunded Cost</b>	<b>Cost Change From FY 2009–2010 to FY 2010–2011</b>	<b>Full-Year Cost Change From FY 2009–2010 to FY 2011–2012</b>
Retirement Contributions	\$28,407,811	\$30,738,131
Retiree Health	2,277,397	2,277,397
Health Benefits	13,780,235	21,517,479
<b>Total Cost</b>	<b>44,465,444</b>	<b>54,533,008</b>
Funding Provided in Budget Act of 2010	-17,862,223	-17,862,223
<b>Net Funding Need</b>	<b>\$26,603,221</b>	<b>\$36,670,785</b>

The FY 2010–2011 cost for health benefits includes cost changes in the areas of medical, dental, vision, and cafeteria plan/flexible benefits/health insurance subsidies.

The 2010 Budget Act provides that subsequent to its passage, the funding appropriated in this item for support for operation of the trial courts will be allocated upon order of the Director of Finance to the trial courts, and that the funding may be increased by order of the Director of Finance to address unanticipated cost increases that exceed the amount appropriated for the item. Consistent with this language, the AOC will coordinate the provision of detailed cost information to the DOF in order to justify the level of funding needed. As indicated above, the Legislature has included increased funding of approximately \$17.862 million in the State Budget, but the actual funding need is \$26.603 million in FY 2010–2011, and \$36.671 million to fund the full-year cost of these changes. The AOC will work with the DOF in an attempt to secure the full level of funding needed in the current fiscal year and in succeeding fiscal years.

### **III. Other Related Information and Recommendations**

#### **Recommendation 12: Trial Court Fund Balance Policy**

12. Approve revisions to the Trial Court Fund Balance Policy (see Attachment 4), which incorporate revised fund balance classifications consistent with the Governmental Accounting Standards Board’s Statement No. 54, for implementation commencing in FY 2010–2011.

#### **Rationale for recommendation 12**

As required by the Legislature, the Judicial Council must report annually on trial court reserves. The Judicial Council adopted a fund balance policy in October 2006, later revised in April 2009, which reflected the standards and guidelines established by the Financial Accounting Standards Board (FASB) and the Governmental Accounting Standards Board (GASB) at that time. The current fund balance policy establishes uniform standards for the reporting of fund balances by trial courts and maintains accountability over the public resources that support trial court operations.

GASB, the independent organization that establishes and improves standards of accounting and financial reporting for U.S. state and local governments, recently released *Statement No. 54: Fund Balance Reporting and Governmental Fund Type Balance* (GASB 54) with the intent of enhancing “the usefulness of fund balance information by providing clearer fund balance classifications that can be more consistently applied and by clarifying the existing governmental fund type definitions. It also establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds.” (GASB 54, Summary Page.)

Accounting and reporting standards for reporting government funds have been significantly clarified by GASB 54. Implementation of these revised standards is intended to result in greater consistency and transparency regarding how governmental funds are *reserved*.

The prior fund balance reporting requirements had two categories; this has now been expanded to five classifications, with the most significant difference being a new classification titled “Nonspendable Fund Balance”. This last classification, though, will have only a marginal impact on the reserve statements of the trial courts. It includes such items as inventories, prepaid expenditures, long-term loans and note receivables, and principal amounts related to certain funds, which have only minimal or negligible relevance to trial court finances. The remaining categories of “Restricted,” “Committed,” “Assigned,” and “Unassigned” more closely resemble the prior policy and instructions from GASB. The two categories of most interest will be the Committed and Assigned categories. Committed Fund Balance relates to *policy issues*, which are established by the Judicial Council. Determination of how and where funds can be spent falls under the classification of Assigned Fund Balance; this will be typically under the purview of the presiding judge of each trial court, consistent with rule 10.603 of the California Rules of Court, which specifies the authority and responsibilities of the presiding judge.

Implementation of the GASB 54 requirements should have no impact upon trial court operations. The data pertinent to GASB 54 is merely being reconfigured, and will only impact a portion of year-end financial reporting. Modest configuration changes will be made in the Phoenix Financial System. The changes in how reserve information is displayed will provide a clearer depiction of these resources.

Revising the current fund balance policy to be in conformance with GASB 54 will ensure that trial courts are in compliance with the requirements specific to governmental agencies that must report on use of resources of funds within the public sector.

There was discussion at the TCBWG meeting regarding adding an additional classification for bridge financing to address the need for reserved funds to transition to ongoing funding changes. The AOC received input from court staff on appropriate language to address this concern. The revised (and attached) policy incorporates this language, as item 8, on the next to last page of Attachment 4.

#### **Alternatives considered and policy implications**

The only alternative discussed was to not incorporate any additional changes to the policy. This would leave the branch policy in non-compliance with GASB 54.

#### **Recommendation 13: Delegation of Authority**

13. Delegate authority to the Administrative Director of the Courts to make minor or technical one-time and ongoing allocations and adjustments to allocations of funds to courts, as necessary, to address unanticipated needs and contingencies and to reflect updated cost estimates, to the extent that sufficient funding is available. Adjustments made under this provision will be reported to the council after the end of the fiscal year.

**Rationale for recommendation 13**

This is a technical delegation to the Administrative Director of the Courts, needed to manage the budget during the fiscal year. For some of the allocations included in this report, the actual amounts may change as updated information is received from the courts, such as changes in agreements for retirement or security salary and benefit costs. Rather than being required to return to the council during the fiscal year to seek authority to amend these allocations, having the authority delegated to the Administrative Director to do so in advance will facilitate allocating funding when final amounts are known.

In addition, each year some courts incur unanticipated costs that may create an immediate cash flow problem. Such unanticipated issues make it advisable that the Administrative Director have the ability to direct unallocated statewide special fund monies in an efficient and flexible manner.

**Alternatives considered and policy implications**

This is standard technical authority needed to manage the annual budget. No specific alternatives were considered, other than coming back to the council any time technical adjustments need to be made or if unanticipated costs arise. This approach, though, would cause delays for getting necessary funding to courts.

**Comments From Interested Parties**

No comments were solicited from other agencies or the public.

# FUND BALANCE POLICY

## BACKGROUND

In the Supplemental Report of the 2006 Budget Act, the Legislature specified that the Judicial Council report on court reserves and provide its policy governing trial court reserves. On October 20, 2006 and revised on April 23, 2009, the Judicial Council approved a fund balance policy for trial courts. Financial accounting and reporting standards and guidelines have been established by the Financial Accounting Standards Board (FASB) and the Governmental Accounting Standards Board (GASB). The Trial Court Financial Policy and Procedures Manual, in compliance with these standards and guidelines, specifies that the trial courts are responsible for the employment of “sound business, financial and accounting practices” to conduct their operations.

In addition, Government Code section 77203 specifies that the Judicial Council has the authority to authorize trial courts to carry over unexpended funds from one year to the next. Consistent with this provision, this policy provides courts with specific directions for identifying fund balance resources necessary to address statutory and contractual obligations on an accurate and consistent basis as well as maintaining a minimum level of operating and emergency funds. In addition, this policy provides the necessary structure to ensure funds are available to maintain service levels for various situations that confront the trial courts including a late state budget.

GASB Statement 54, Fund Balance Reporting and Governmental Fund Type Definitions, is effective for financial statements for periods beginning after June 15, 2010, and will impact year-end closing statements for the fiscal year 2010–2011.

## PURPOSE

~~Governmental agencies/entities report the difference between their assets and obligations as fund balance, which is divided into restricted and unrestricted categories. The function of the restricted fund balance is to isolate the portion of fund balance that represents resources required to address statutory and contractual obligations. Under GASB Statement 54, fund balances for governmental funds must be reported in classifications that comprise a hierarchy. The statement distinguishes between nonspendable and other amounts that are classified based on the relative strength of the constraints that control the purposes for which specific amounts can be spent. Under GASB 54, the number of classifications has been expanded from 2 to 5.~~

The purpose of this policy is to establish uniform standards, consistent with GASB 54, for the reporting of fund balance by trial courts and to maintain accountability over the public resources used to finance trial court operations.

## POLICY

As publicly funded entities, and in accordance with good public policy, trial courts must ensure that the funds allocated and received from the state and other sources are used efficiently and accounted for properly and consistently. The trial courts shall account for and report fund balance in accordance with established standards, utilizing approved classifications. Additionally, a fund balance can never be negative.

1  
2 **Fund Balance Categories Classifications**

3  
4 When allocating fund balance to the categories and subcategories, allocations are to follow  
5 the following prioritization:

- 6  
7 1. Statutory fund balance.  
8 2. Contractual commitments to be paid in the next fiscal year.  
9 3. The minimum calculated operating and emergency fund balance.  
10 4. Other Judicial Council mandates to be paid in the next fiscal year.  
11 5. Contractual commitments to be paid in subsequent fiscal years.  
12 6. Other Judicial Council mandates to be paid in subsequent fiscal years.  
13 7. Other designated subcategories and/or the undesignated subcategory.

14  
15 If there is insufficient fund balance to cover any or all of the first four priorities, the shortfall  
16 should be explained in detail in attached footnotes. Also, there are additional reporting  
17 requirements when the amount allocated to the operating and emergency fund balance is  
18 below the minimum required.

19  
20 **Restricted Fund Balance.** This fund balance category is not available for purposes other  
21 than or contractual purposes.

22  
23 **Statutory**—A restricted fund balance that consists of unspent, received revenues  
24 whose use is statutorily restricted.

25  
26 **Contractual**—A restricted fund balance set aside for executed contractual  
27 commitments beyond the current fiscal year (e.g., multi-year contracts).

28  
29 **Unrestricted Fund Balance.** This is a fund balance that is comprised of funds that are  
30 neither contractually nor statutorily restricted but may, by policy, require minimum  
31 amounts be maintained or identified.

32  
33 **Designated**—The portion of unrestricted fund balance that is subject to tentative  
34 management plans. For each specific plan, courts must select a specific designated  
35 sub-category that is listed and provide a detailed description of the planned use of the  
36 fund balance. Specific plans that fall under the same designated sub-category must be  
37 listed separately.

38  
39 **Undesignated**—The portion of fund balance that is neither restricted nor designated.

40  
41 **Designated Fund Balances**

42 For designated fund balances that are based on estimates, particularly the operating and  
43 emergency (above the minimum required), leave obligations, and retirement fund balance  
44 designated subcategories, explanations of the methodology used to compute or determine the  
45 designated amount must be provided. Designations or planned uses include but are not  
46 limited to:

- 47  
48 ——— 1. Operating and Emergency

1       — Each court shall maintain a minimum operating and emergency fund balance at all  
 2       times as determined by the following calculation based upon that fiscal year's  
 3       total unrestricted general fund expenditures (excluding special revenue, debt  
 4       service, permanent, proprietary, and fiduciary funds), less any material one-time  
 5       expenditures (e.g., large one-time contracts):

6	_____
7	_____ <u>Annual General Fund Expenditures</u> _____
8	_____ 5 percent of the first \$10,000,000
9	_____ 4 percent of the next \$40,000,000
10	_____ 3 percent of expenditures over \$50,000,000 _____

11  
 12       — If a court determines that it is unable to identify the minimum operating and  
 13       emergency fund balance level as identified above, the court shall immediately  
 14       notify the Administrative Director of the Courts, or designee, in writing and  
 15       provide a plan with a specific timeframe to correct the situation.

16  
 17       — **2. One-time facility – Tenant improvements** Examples include carpet and fixture  
 18       replacements.

19  
 20       **3. One-time facility – Other** Examples include amounts paid by the AOC on behalf  
 21       of the courts.

22  
 23       **4. Statewide Administrative Infrastructure Initiatives** Statewide assessment in  
 24       support of technology initiatives (e.g., California Case Management System and  
 25       Phoenix) will be identified in this designation.

26  
 27       — **5. Local Infrastructure (Technology and non-technology needs)** Examples  
 28       include interim case management systems and non-security equipment.

29  
 30       **6. One-time employee compensation (Leave obligation, retirement, etc.)**  
 31       Amounts included in this category are exclusive of employee compensation  
 32       amounts already included in the court's operating budget and not in a designated  
 33       fund balance category.

34  
 35       a. **One-time leave payments at separation from employment.** If amounts are not  
 36       — already accounted for in a court's operating budget, estimated one-time payouts  
 37       for vacation or annual leave to employees planning to separate from employment  
 38       within the next fiscal year should be in this designated fund balance sub-category.  
 39       This amount could be computed as the average amount paid out with separations  
 40       or other leave payments during the last three years. Any anticipated non-normal  
 41       or unusually high payout for an individual or individuals should be added to at the  
 42       average amount calculated.

43  
 44       — In a footnote, the court should note the amount of its employees' currently earned  
 45       leave balance that is more than the established designated fund balance. The  
 46       amount would be determined by multiplying the hours of earned vacation or  
 47       annual leave on the payroll records for each employee times his or her current  
 48       salary rate minus the designated fund balance established.

1  
2 ~~b. Unfunded pension obligation. If documented by an actuarial report, the amount~~  
3 ~~of unfunded pension obligation should be included as a designated fund balance.~~  
4 ~~Employer retirement plan contributions for the current fiscal year must be~~  
5 ~~accounted for in the court's operating budget.~~  
6

7 ~~—In a footnote, the court should note the amount of the current unfunded pension~~  
8 ~~obligation that is in excess of the established designated fund balance.~~  
9

10 ~~e. Unfunded retiree health care obligation. If documented by an actuarial report, the~~  
11 ~~amount of unfunded retiree health care obligation should be included as a~~  
12 ~~designated fund balance.~~  
13

14 ~~The current year's unfunded retiree health care obligation contains: (i) the current~~  
15 ~~year Annual Required Contribution (ARC) based on a 30-year amortization of~~  
16 ~~retiree health costs as of last fiscal year end and (ii) the prior year retiree health~~  
17 ~~care obligation less (iii) the retiree health care employer contributions and any~~  
18 ~~transfers made to an irrevocable trust set up for this purpose. The current year's~~  
19 ~~unfunded retiree health care obligation is to be added to the prior year's~~  
20 ~~obligation.~~  
21

22 ~~Note: The ARC amounts are located in each court's actuarial report, which is~~  
23 ~~entitled "Postretirement Benefit Valuation Report".~~  
24

25 ~~In a footnote, the court should note the amount of the cumulative unfunded~~  
26 ~~retiree health care obligation that is in excess of the established designated fund~~  
27 ~~balance.~~  
28

29 ~~d. Workers compensation (if managed locally). The amount estimated to be paid~~  
30 ~~out in the next fiscal year.~~  
31

32 ~~**7. Professional and consultant services** Examples include human resources, —~~  
33 ~~information technology, and other consultants.~~  
34

35 ~~**8. Security** Examples include security equipment, and pending increases for~~  
36 ~~security service contracts.~~  
37

38 ~~**9. Other (required to provide detail)** Any other planned commitments that are not~~  
39 ~~appropriately included in one of the above designated fund balance sub-categories~~  
40 ~~should be listed here with a description in sufficient detail to determine its purpose~~  
41 ~~and requirements.~~  
42

43 Beginning with the most binding constraints, fund balance amounts must be reported in the  
44 following classifications:  
45

- 46 • Nonspendable Fund Balance
- 47 • Restricted Fund Balance

- 1 • Committed Fund Balance
- 2 • Assigned Fund Balance
- 3 • Unassigned Fund Balance (General Fund only)

4  
5 When allocating fund balance to the classifications and categories, allocations must follow  
6 the following prioritization:

- 7
- 8 1. Nonspendable Fund Balance
- 9 2. Restricted Fund Balance
- 10 3. Contractual commitments to be paid in the next fiscal year
- 11 4. The minimum calculated operating and emergency fund balance
- 12 5. Other Judicial Council mandates to be paid in the next fiscal year
- 13 6. Contractual commitments to be paid in subsequent fiscal years
- 14 7. Assigned Fund Balance designations
- 15 8. Unassigned Fund Balance

16  
17 If there is insufficient fund balance to cover any or all of the first five priorities, the shortfall  
18 should be explained in detail in attached footnotes. Also, there are additional reporting  
19 requirements when the amount allocated to the operating and emergency category is below  
20 the minimum required.

### 21 22 **Nonspendable Fund Balance**

23  
24 Nonspendable Fund Balance includes amounts that cannot be spent because they are either  
25 (a) not in spendable form (not expected to be converted to cash) or (b) legally or  
26 contractually required to be maintained intact. Examples include:

- 27
- 28 • Inventories
- 29 • Prepaid amounts Long-Term Loans and Notes Receivable
- 30 • Principal of a permanent (e.g., endowment) fund

31  
32 This represents the ‘newest’ classification in comparison to the descriptions used before the  
33 creation of GASB 54. To some extent, the remaining 4 classifications are somewhat  
34 mirrored in the prior definitions.

### 35 36 **Restricted Fund Balance**

37  
38 Restricted Fund Balance includes amounts constrained for a specific purpose by external  
39 parties, constitutional provision or enabling legislation.

- 40
- 41 • Externally imposed  
42 Imposed externally by grantors, creditors, contributors, or laws or regulations of other  
43 governments ( i.e., monies received by a grantor that can only be used for that  
44 purpose defined by the grant).
- 45 • Imposed by Law (Statutory)  
46 A restricted fund balance that consists of unspent, receipted revenues whose use is

1 statutorily restricted (e.g., children’s waiting room and dispute resolution program  
 2 funding).

### 4 **Committed Fund Balance**

6 Committed Fund Balance includes amounts that can only be used for specific purposes  
 7 pursuant to constraints imposed by formal action of the Judicial Council. These committed  
 8 amounts cannot be used for any other purpose unless the Judicial Council removes or  
 9 changes the specified use by taking the same type of action it employed to previously commit  
 10 those amounts.

12 Committed Fund Balance must also include contractual obligations to the extent that existing  
 13 resources in the fund have been specifically committed for use in satisfying those contractual  
 14 requirements. While the requirement to include contractual commitments is a policy  
 15 decision of the Judicial Council, the type, number and execution of contracts is within the  
 16 express authority of presiding judges or their designee.

18 The Judicial Council has authorized a stabilization arrangement (Operating and Emergency  
 19 fund category) to be set aside for use in emergency situations or when revenue shortages or  
 20 budgetary imbalances might exist. The amount is subject to controls that dictate the  
 21 circumstances under which the court would spend any of the minimum operating and  
 22 emergency fund balance.

24 Each court must maintain a minimum operating and emergency fund balance at all times  
 25 during a fiscal year as determined by the following calculation based upon the prior fiscal  
 26 year’s ending total unrestricted general fund expenditures (excluding special revenue, debt  
 27 service, permanent, proprietary, and fiduciary funds), less any material one-time expenditures  
 28 (e.g., large one-time contracts).

30	<u>Annual General Fund Expenditures</u>
31	<u>5 percent of the first \$10,000,000</u>
32	<u>4 percent of the next \$40,000,000</u>
33	<u>3 percent of expenditures over \$50,000,000</u>

35 If a court determines that it is unable to maintain the minimum operating and emergency  
 36 fund balance level as identified above, the court must immediately notify the Administrative  
 37 Director of the Courts, or designee, in writing and provide a plan with a specific timeframe to  
 38 correct the situation.

### 40 **Assigned Fund Balance**

42 This is a fund balance that is constrained by the Presiding Judge, or designee, with the intent  
 43 that it be used for specific purposes or designations that are neither unspendable, restricted  
 44 nor committed.

46 Constraints imposed on the use of assigned amounts are more easily removed or modified  
 47 than those imposed on amounts that are classified as committed. Assigned amounts are

1 based on estimates and explanations of the methodology used to compute or determine the  
 2 designated amount must be provided.

3  
 4 Assigned fund balances include:

- 6 • All remaining amounts that are reported in governmental funds, other than general  
 7 fund, that are not classified as nonspendable and are neither restricted nor committed  
 8 and
- 9 • Amounts in the general fund that are intended to be used for a specific purpose in  
 10 accordance with the provision identified by the Presiding Judge, or designee.

11  
 12 Courts will identify assigned fund balances according to the following categories:

- 14 1. **One-time facility – Tenant improvements** Examples include carpet and fixture  
 15 replacements.
- 17 2. **One-time facility – Other Examples** include amounts paid by the AOC on behalf of  
 18 the courts.
- 20 3. **Statewide Administrative Infrastructure Initiatives.** Statewide assessment in  
 21 support of technology initiatives (e.g., California Case Management System and  
 22 Phoenix) will be identified in this designation.
- 24 4. **Local Infrastructure (Technology and non-technology needs)** Examples include  
 25 interim case management systems and non-security equipment.
- 27 5. **One-time employee compensation (Leave obligation, retirement, etc.)** Amounts  
 28 included in this category are exclusive of employee compensation amounts already  
 29 included in the court's operating budget and not in a designated fund balance  
 30 category.
  - 32 a. One-time leave payments at separation from employment. If amounts are not  
 33 already accounted for in a court's operating budget, estimated one-time payouts  
 34 for vacation or annual leave to employees planning to separate from employment  
 35 within the next fiscal year should be in this designated fund balance sub-category.  
 36 This amount could be computed as the average amount paid out with separations  
 37 or other leave payments during the last three years. Any anticipated non-normal  
 38 or unusually high payout for an individual or individuals should be added to at the  
 39 average amount calculated.

40  
 41 In a footnote, the court should note the amount of its employees' currently earned  
 42 leave balance that is more than the established designated fund balance. The  
 43 amount would be determined by multiplying the hours of earned vacation or  
 44 annual leave on the payroll records for each employee times his or her current  
 45 salary rate minus the designated fund balance established.

- 1 b. Unfunded pension obligation. If documented by an actuarial report, the amount  
2 of unfunded pension obligation should be included as a designated fund balance.  
3 Employer retirement plan contributions for the current fiscal year must be  
4 accounted for in the court's operating budget.

5  
6 In a footnote, the court should note the amount of the current unfunded pension  
7 obligation that is in excess of the established designated fund balance.

- 8  
9 c. Unfunded retiree health care obligation. If documented by an actuarial report, the  
10 amount of unfunded retiree health care obligation should be included as a  
11 designated fund balance.

12  
13 The current year's unfunded retiree health care obligation contains: (i) the current  
14 year Annual Required Contribution (ARC) based on a 30-year amortization of  
15 retiree health costs as of last fiscal year-end and (ii) the prior year retiree health  
16 care obligation less (iii) the retiree health care employer contributions and any  
17 transfers made to an irrevocable trust set up for this purpose. The current year's  
18 unfunded retiree health care obligation is to be added to the prior year's  
19 obligation.

20  
21 Note: The ARC amounts are located in each court's actuarial report, which is  
22 entitled "Postretirement Benefit Valuation Report".

23  
24 In a footnote, the court should note the amount of the cumulative unfunded retiree  
25 health care obligation that is in excess of the established designated fund balance.

- 26  
27 d. Workers compensation (if managed locally). The amount estimated to be paid out  
28 in the next fiscal year.

- 29  
30 e. Use of reserve funds for liquidation of outstanding leave balances for employees  
31 in a layoff situation, consistent with the requirements of GASB 45; other  
32 examples would include reserving funds for the implementation of "enhanced  
33 retirement" or "golden handshake" programs in the interest of eliminating salaries  
34 at the "high end" or "top step", and thereby generating salary savings or rehires at  
35 the low end of a pay scale for position(s), but realizing one-time costs in the  
36 interest of longer term savings for the court.

- 37  
38 6. **Professional and consultant services.** Examples include human resources,  
39 information technology, and other consultants.  
40  
41 7. **Security.** Examples include security equipment; and pending increases for security  
42 service contracts.  
43  
44 8. **Bridge Funding.** A court may choose to identify specific short or intermediate term  
45 funding amounts needed to address future needs that are otherwise not reportable, nor  
46 fit the criteria, in either restricted nor committed classifications, that it believes are

1 necessary to identify through specific designations. These designations must be listed  
2 with a description in sufficient detail to determine their purpose and requirements.  
3

- 4 9. **Miscellaneous (required to provide detail).** Any other planned commitments that  
5 are not appropriately included in one of the above designated fund balance sub-  
6 categories should be listed here with a description in sufficient detail to determine its  
7 purpose and requirements.  
8

9 **Unassigned Fund Balance – for General Fund Use Only**

10  
11 Unassigned Fund Balance is the residual classification for the general fund. This  
12 classification represents fund balance that has not been assigned to other fund balance and  
13 that has not been restricted, committed, or assigned to specific purposes within the general  
14 fund.  
15

16 The general fund is the only fund that shall report a positive unassigned fund balance  
17 amount.
