

Lesson Plan: *Make Good Choices! Presidential Election*

Student Handouts:

Patriot or **Dangerous** **Radical??????**

In the midst of all the campaign rhetoric and excitement, it's easy for well-meaning voters to miss a candidate's real message. What sounds like concern for the country might just be something else entirely, something almost **shocking!**

What is the real message? Should voters **be concerned?**

Rumors have been circulating about his connections with well-known Socialist organizations. If these are to be believed, electing this candidate would bring **SOCIALISM** into the White House!!!! Can our country take that kind of **RISK?**

In addition, recent internet posts by concerned citizens have revealed **questions** about the candidate's personal history. If these revelations are true, we are inviting a person who makes **poor** personal **decisions**, to make decisions about government.

Can our country afford to let this happen?

Letters to the Editor

It has been my pleasure to know and work with for over twenty years. During that time, I have observed the commitment, passion, and get-it-done attitude that marks a great leader. While serving as Project Manager in our great state, this candidate's efforts, and collaboration with others led to the creation of our intra-city electric rail system, numerous public art work projects, including the world-famous Bridge Sculpture in front of the state capitol building, and introduction of free rural children's health clinics.

There are a lot of things said during presidential campaigns. A lot of promises are made. Before people vote, they must look at the records of the candidates and consider what they have done, as well as said.

The record of this candidate shows actions that have meant less pollution, beautiful cities, and lives saved. I strongly endorse this candidate as our best possible choice for President.

Sincerely,

Dr. M. Swan Boathillia
