

Criminal Justice Services
Behavioral Health Education Series presents

PARTNERING WITH COUNTY BEHAVIORAL HEALTH TO SERVE JUSTICE-INVOLVED POPULATIONS

Join us for a webinar about county behavioral health to learn what services county behavioral health provides, including the different treatment options, levels of care, and types of treatment providers. This presentation will also discuss how courts, with the partnership of county behavioral health, can effectively operate diversion and collaborative court programs by navigating the red tape to best serve defendants with substance use or mental health issues while keeping communities safe. Moderating the discussion between county behavioral health staff, justice, and court partners are Amy Kimpel and Arley Lindberg from the Judicial Council.

Participant learning objectives include:

- + Identifying the array of services offered through county behavioral health including treatment providers, treatment options, and levels of care.
- + Describing the framework for the provision of county behavioral health services, including the role of the Affordable Care Act, Medi-Cal, and the Mental Health Services Act.
- + Identifying strategies for working effectively with county behavioral health partners.

Thursday, February 7th, 2019
12:00pm to 1:30pm (PT)
(1.0 hr judicial continuing education credit available)

Registration closes February 4th or until full
