Please consider this to be my personal comment on the recent Strategic Evaluation Committee report, and my belief that all recommendations in that report should be implemented at the earliest possible opportunity.

With due respect to the efforts of employees, attorneys, managers, supervisors, and administrators of the Administrative Offices of the Court, the organization has grown out of control, all to the severe detriment of the trial courts, and the people of the State of California.

Thank you for considering this comment. Commissioner Rocky L. Crabb.
