I would like to join many of my fellow judges in urging a speedy implementation of the recommendations made in the SEC report. I know there are some who are promoting a delay in following the recommendations. They use various arguments including the idea of waiting for a new executive director. Whatever excuse is used, a delay is not in the best interest of the courts. The authors of the SEC report worked diligently for over a year to evaluate the system and make valid, commonsense recommendations. Please don't find excuses to delay implementing this well thought out report. Thank you. Judge Colette Humphrey
