To Whom It May Concern:

It is my opinion that we should immediately implement all of the SEC recommendations. I feel very strongly about this. I realize that the AOC does provide us with some excellent resources, but these benefits are very strongly outweighed by the way they have operated, ie., wasteful spending on their staff and projects. I was personally involved in the early implementation of the CCMS project in Orange County and you would not believe what took place, but that is another long story.

Thank you for your time and consideration of my opinion.
