---

The enormous bureaucracy that is the AOC has never been needed. This should now be obvious to anyone who has been involved with the courts for any length of time. The SEC report demonstrates that what was obvious was only the tip of the iceberg. The Judicial Council should without further delay adopt all of the recommendations and get the judicial branch back to its business of delivering justice. Enough damage has been done to the courts and sadly the legacy will always be a loss of respect and integrity for our branch. Instead of demonstrating willingness to accept valid criticism and make reform, we are faced with yet another period of duplicative comment, dithering and deliberation. Please just do it! Adopt the reforms.
