I have been licensed to practice law since 1976,and had active trial practice appearing in court almost daily. I am a Commissioner of the Los Angeles Superior Court and have been so since September 2003. I have read the SEC report in it's entirety. I urge you to adopt and implement all recommendations of the committee immediately. A failure to implement the recommendations will send a clear message to the legislature that they must take action and do what the judicial branch has been unwilling to do.
