Subject: Comment on SEC Report
Date: Friday, July 20, 2012 1:20:30 PM

Please, PLEASE, take action to quickly implement the recommendations in the SEC Report!

What the judicial branch has been subjected to by the AOC - incrementally but inexorably - is exposure to a virus that has sapped the vitality and strength of the judicial branch to feed its own misguided objectives. What we have ended up with is a case of the tail wagging the dog. The SEC Report provides a treatment plan to beat the virus and restore the health, both of the AOC (to perform its core functions in supporting the trial courts), and of the trial courts (to reverse the de facto starvation arising from misdirected resources, so the ends of justice can be adequately served). To further the analogy, the treatment plan has no value whatsoever unless the Judicial Council accepts its role as the Primary Care Physician and fulfills its responsibility by implementing plan recommendations. The road back to health will take time and will not be easy, but it should start NOW!
