---

When the SEC report was first released, I was heartened to know that my viewpoint regarding these many issues did indeed have a voice. Unfortunately, since that time, it has become clear that this well considered report is being viewed as something to resist, rather than a roadmap back to credibility. The AOC was created to assist the Judiciary in the critical mission of dispensing justice. This is a mission at the core of what makes the United States of America different from all others. Nothing should be allowed under our Constitution to thwart this brave endeavor. For too long, the AOC has existed in a morphed state belying their original charter. Adoption of the SEC recommendations in their entirety will restore the AOC's credibility and effectiveness. Please do not squander this opportunity. Implement the recommendations immediately.

Bryan K. Stainfield  
Superior Court Judge
