

**Superior Court of California, San Bernardino County**  
**Magic Money Machine**  
**Automated Check Processing vs. Manual Check Processing**

1 Batch of 250 payments = 20 minutes on Machine  
5 hours to Manually Process by 4 Clerks

2 / 4 Batches a Day = 40 minutes / 1 hour 20 min  
1.25 / 2.5 days to Manually Process by 4 Clerks

-----  
Note: With current staffing level manual processing could result in up to a 20 business hour delay in recording receipt to case management system.

For calendar year 2010 the Magic Money Machine processed 15% of the total revenue and 32% of check volume received by the court with 4 clerks, who comprise only 0.9% of the total court wide staff that processes payments. Based on 2010 volume the department would need to increase staffing by 6 FTEs or \$310k in order to keep up with the machine processing time. In addition, without the machine's capability to encode our deposits we would have incurred an additional \$5k in bank fees in 2010 alone.
